CUSTOMARY NOTES.

VENUS will be Morning Star until July 19, then Evening Star until May 10, 1857. MARS will be Morning Star until April 1, then Evening Star, until June 7, 1857. JUPITER will be Evening Star until March 5, then Morning Star until September 26, then Evening Star until April 11, 1857. SATURN will be Evening Star until June 24, then Morning Star until December 31, then Evening Star until July, 10, 1857.

The MOON will run lowest this year on October 6, to the 3d degree of Sagittarius, having a declination of 28° 36′ 1.2″ south. It will run highest on the 18th of October, to the 3d degree of Gemini, having a declination of 28° 35′ 32.2″ north. This declination is about a *maximum*, by which the MOON can run much further north and south than the SUN ever can by about 5° 8′ 48″. The longitude of the MOON's Ascending Node, June 1, 30° 11.1′, and on the 31st of December it will be 10° 51.4′. Apparent obliquity of the ecliptic July 19, 23° 27′ 36.11″.

The SUN will be north of the Equator this tropical year, dating from the Solstice of December, 1855, 186 days, 11 hours, 4 minutes; and south of it, 178 days, 18 hours, 47 minutes; showing a difference of 7 days, 16 hours, 17 minutes; which is caused by the slower motion of the Earth when near its aphelion in July.

Distance of the EARTH from the SUN, July 2, 96,702,364 miles; its mean distance March 31, and October 2, 96,103,000 miles.

MARS will move from east to west past stars in the sky, from February 24 to May 14, a distance of about 18°. JUPITER will move in the same manner from July 29 to November 24, a distance of 9°. SATURN moves in the same direction until February 23, and from October 26, to the end of the year. VENUS moves directly, or from west to east, all the year.

The planet JUPITER will be Eclipsed by the MOON on the 19th of August, visible. It disappears at 1 o'clock and 5 minutes in the morning, at Washington, and reappears at 1 hour and 59 minutes.

ECLIPSES IN THE YEAR 1856.

There will be two Eclipses of the SUN, and two of the MOON, this year, the latter being visible.

I. A Total Eclipse of the SUN, April 5th, invisible.

II. A Partial Eclipse of the MOON, April 20th, in the morning, visible. Magnitude 8.544 digits, or over two-thirds of the MOON, on the northern limb. Begins at 2 h. 19 m., morning; middle, 3 h. 51 m. The MOON sets at 5 h. 24 m., *just* at the moment the eclipse ENDS.

III. An Annular Eclipse of the SUN, September 28th, invisible.

IV. A Partial Eclipse of the MOON, October 13th, in the evening, visible. The MOON rises at 5 h. 20 m., with 9.526 digits eclipsed. Middle at 5 h. 39 m., at which the eclipse will be 11.976 digits in size on the southern limb. Ends at 7 h. 13 m.

STATE LIBRARIAN.

Oliver H. Perry, of Raleigh.

POST-OFFICE REGULATIONS.

Among the regulations just issued by the Postmaster-General, to carry out the recent laws of Congress, are the following:—

All *newspapers* transmitted through the mails will be hereafter rated with postage, except exchange papers between the publishers of newspapers, and those franked by persons enjoying the privilege; and contractors may take newspapers out of the mails for sale or distribution among subscribers.

Transient newspapers, or those not sent from the office of publication to subscribers, handbills, or circular letters, printed or lithographed, not exceeding one sheet in size, will pay one cent upon delivery at the office, and before they are put in the mail, and all such will be charged by postmasters as prepaid matter, in the way-bills, and upon the account of mails sent, and stamped or marked "paid," with the name of the office from which sent.

NEW POSTAGE LAW.

Rates of Newspaper Postage.—The new amendment to the postage law which goes into operation on the 30th of September, 1852, fixes the rate of each newspaper, periodical, circular, or other printed matter, not exceeding three ounces, at one cent, to any part of the United States; for each additional ounce, or fraction, one cent; when paid yearly, or quarterly, in advance, at the office where delivered, only one-half this rate to be charged. Newspapers and periodicals not exceeding one ounce and a half, to be charged only one-half the above rates in the States where published. Packages of several small newspapers or pamphlets, of not more than sixteen octavo pages, to one address, to be charged only half a cent an ounce. The postage on all transient matter to be prepaid, or charged double these rates.

Books, bound or unbound, are to be deemed mailable, when not weighing over four pounds, and chargeable with one cent an ounce for under 3000 miles; and two cents for over that distance—fifty per cent. to be added when not prepaid.

Publishers of newspapers and periodicals are permitted to send exchange copies, and to inclose bills and receipts free of postage.

Rates of Letter Postage.—The rates of letter postage between places in the United States and also between the United States and Canada, are as follows:—

	UNITED STATES.		CANADA.	
	For not over 3000 miles.	For over 3000 miles.	To and from Canada, for not over 3000 miles.	For over 3000 miles.
Weighing half an ounce or under, being the single rate,	cts. 3	cts. 6	cts. 10	cts. 15
Over half an ounce and not over one ounce,	6	12	20	30
Over one ounce and not over one and a half,	9	18	30	45
Over one and a half ounce and not over two,	12	24	40	60
Over two ounces and not over two and a half,	15	30	50	75

All letters must be prepaid, or they will not be sent.

The Congress of the United States consists of a Senate and House of Representatives, and must assemble at least once every year, on the first Monday in December, and also at the call of the President by proclamation.

The Senate is composed of two members from each State, which are chosen by the Legislatures of the several States, for the term of six years, one-third of them being elected biennially.

The Vice-President of the United States is the President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. In his absence, a President *pro tempore* is chosen by the Senate.

The House of Representatives is composed of members from the several States, elected by the people for two years. The Representatives are apportioned among the different States according to population.

The present ratio, according to the new apportionment, is one member for every 70,680 souls in each State, making the whole number of members 233.

The compensation of each member of the Senate and House of Representatives is $8 a day during the period of his attendance in Congress, and $8 for every twenty miles travel in the usual road, in going to, and returning from the seat of Government. The compensation of the President of the Senate, *pro tempore*, and of the Speaker of the House of Representatives, is $16 a day.

The number of Electors of President and Vice-President, under the new apportionment, will be 275, [instead of 294, as in 1819,] of whom 138 will be necessary for a choice.

The Government of the United States is represented by Ministers Plenipotentiary at the Courts of Great Britain, France, Russia, Prussia, Austria, Spain, Brazil, and Mexico; and by Charges d'Affaires at the courts of most of the other foreign countries with which this country is much connected by commercial intercourse.

The pay of Ministers Plenipotentiary is $9,000 per annum, as a salary, besides $9,000 for outfit. The pay of Charges d'Affaires is $4,500 per annum; of Secretaries of Legation, $2,000; of Ministers Resident, $5,000.

The streets of London first lighted with gas, 1814.

The above items show how slowly the condition of man has changed from age to age. During the first thirteen centuries of the Christian Era, there was hardly any improvement of mankind, in their social, political, or intellectual systems. The liberation of the public mind from its depressing tendencies, by the invention of printing, the reformation, and the introduction of fire-arms, has produced the rapid progress which it has made during the last few centuries, in noble inventions and discoveries, running through the whole circle of art, science, and literature. With the "wings of the morning" it has gone to the uttermost parts of the earth; it has grasped the highest truths of the sky above, and sought out the profound depths below; and in every place, and over all subjects, mind is asserting its mastery, and achieving conquests.

BE CAREFUL OF SMALL THINGS.

Irving, in his life of Washington, dwells on the particularity with which the great hero attended to the minutest affairs. The Father of his country, as his correspondence and account books show, was "careful of small things" as well as of great; not disdaining to scrutinize the most petty expense of his household; and this even while he was acting as the first magistrate of the first republic in the world. In private circles in this city, tradition preserves numerous anecdotes of this characteristic, which, if necessary, we could quote—

The example of Washington in this respect, might teach an instructive lesson to those who scorn what they call "petty" details. There are thousands of such individuals in every community. We all know more or less of them. Nothing is worthy of attention, in their opinion, unless it can be conducted on a grand scale. They will not condescend to the pennies, it is only the dollars to which they will attend. They spurn a small business. They talk superciliously of those who overlook the little leakages

that waste so much money in every concern. To hear them, one might think they were above the ordinary affairs of life, and that nothing was worthy of their time, except discovering a California, or conquering a kingdom.

Yet no man ever made a fortune, or rose to greatness in any department, without being "careful of small things." As the beach is composed of grains of sand, as the ocean is made up of drops of water, so the millionaire is the aggregation of the profits of single ventures, often inconsiderable in amount. Every eminent merchant, from Girard and Astor down, has been noted for his attention to details. Few distinguished lawyers have ever practised in the courts, who have not been remarkable for a similar characteristic; it was one of the most striking peculiarities of the first Napoleon's mind. The most petty details of his household expenses, the most trivial facts relating to his troops, were, in his opinion, as worthy of his attention, as the tactic of a battle, the plan of a campaign, or the revision of a code. Demosthenes, the world's unrivalled orator, was as anxious about gestures or his intonation, as about the texture of his argument or its garniture of words. Before such great examples, and in the very highest walks of intellect, how contemptible the conduct of the small minds who despise small things!

RULES FOR THE JOURNEY OF LIFE.

The following rules from the papers of Dr. West, were, according to his memorandum, thrown together as general waymarks in the journey of life.

Never to ridicule sacred things, or what others may consider as such, however absurd they may appear to be.

Never show levity when people are professedly engaged in worship.

Never to resent a supposed injury, till I know the view and the motive of the author of it; nor on any occasion to retaliate.

Never to judge a person's character by external appearance.

Always to take the part of an absent person who is censured in company, as far as truth and propriety will allow.

Never to think the worse of another on account of his differing from me in political or religious opinions.

Not to dispute with a man more than seventy years of age, nor with a woman, nor with an enthusiast.

Not to affect to be witty, or to jest so as to wound the feelings of another.

To say as little as possible of myself and those who are near to me.

To aim at cheerfulness without levity.

Not to intrude my advice unasked.

Never to court the favor of the rich by flattering either their vanity or vices.

To speak with calmness and deliberation on all occasions, especially in circumstanees which tend to irritate.

Frequently to review my conduct, and note my failings.

On all occasions to have a due respect to the end of life and a future state.

TO FATTEN FOWLS.

The best food for fattening fowls is potatoes mixed with meal. Boil the potatoes and mash them fine while they are hot, and mix the meal with them just before it is presented. They fatten on this diet in less than half the time they do on corn.

GUNN'S DOMESTIC MEDICINE.

This book points out, in plain language, free from doctors' terms, the Diseases of Men, Women, and Children, and the latest and most improved means used in their cure, and is intended expressly for the benefit of families. It also contains descriptions of the MEDICAL ROOTS AND HERBS OF THE UNITED STATES, and how they are to be used in the cure of diseases. It is arranged on a new and simple plan, by which the practice of Medicine is reduced to principles of common sense.

This invaluable book has passed through many editions; it has now been revised and improved in every respect, and enlarged to nearly double its former size; and contains nine hundred octavo pages.

It does not propose to dispense with physicians in severe cases; but it does propose to save thousands and tens of thousands annually, by putting the means of cure into every man's hands, and of saving many valuable lives (which is of far more importance), by instructing individuals how to check disease in its beginnings, before it has acquired too much strength to resist and overcome.

For sale by HENRY D. TURNER.

RALEIGH, N. C., 1856.

DR. STRONG'S COMPOUND SANATIVE PILLS.

These Pills are entirely Vegetable, and are a most superior Medicine in the cure of all *Bilious Complaints, Chills and Fever, Dyspepsia, Costiveness, Liver Complaint, Jaundice, Sick Headache, Scrofula, Salt Rheum, Fevers of all kinds, Loss of Appetite, Obstructed and painful Menstruation. and all lingering diseases.*

As a Female Medicine they act like a charm, and when taken according to the directions, they never fail to cure the worst cases of **Piles**, after all other remedies fail.

They purify the blood, equalize the circulation, restore the Liver, Kidneys, and other Secretory Organs to a healthy tone, and action; and as an Autibilious Family Medicine they have no equal. Price 25 cents per box.

Also.

DR. STRONG'S PECTORAL STOMACH PILLS.

A remedy for Coughs, Colds, Catarrh, Bronchitis, Croup, Hooping Cough, Asthma, Consumption, Nervous Diseases, Dyspepsia, Costiveness, Erysipelas, Disease of the Heart, Inflammation and Pain in the Chest, Back and Side, and all diseases arising from a deranged state of the Stomach, and to relieve the distress and bad feeling from eating too hearty food, in weak and dyspeptic habits.

WARRANTED TO BE PURELY VEGETABLE.

These Pills act as an Expectorant, Tonic, and Aperient. One 25 cent box possesses three times more power to cure diseases than a one dollar bottle of any of the Syrups, Balsams, or Sarsaparillas that was ever made, and a simple trial of only one box will prove this important truth.

They promote Expectoration, Loosen the Phlegm, and Clear the Lungs and other Secretory Organs of all morbid matter, and there is not another remedy in the whole Materia Medica capable of imparting such healing properties to the Lungs and Vital Organs as these Pills, **They cure Costiveness, produce a good, regular Appetite, and strengthen the System.**

Price 25 cents per box, containing 25 doses of Medicine.

Call on the Agents who sell the Pills, and get the *Planter's Almanac* GRATIS, giving full particulars and certificates of cures.

DR. SPENCER'S VEGETABLE PILLS.

Time, which "tries all things," has thoroughly established the inestimable value of these Pills as a Cathartic, Antibilious and Detergent Medicine. Their reputation, founded on long experience, still continues to increase. They may truly be termed the *great household Medicine of the South and West.* No other pills have been so widely patronized in those regions. They are purely vegetable in their nature, and so mild and gentle in their operation that they may be given with perfect safety. even to an infant. Females can use them at all periods with perfect safety. They act like a charm in every species of complaint affecting the Stomach and Bowels. Price 25 cents per box.

DR. HULL'S VEGETABLE FEVER AND AGUE PILLS.

Among all the advertised remedies of the day for Ague and Fever, or Chill and Fever, none seem to give so much general satisfaction as DR. HULL'S CELEBRATED PILLS. Wherever they have been introduced, *Dr. Hull's Ague Pills* have been received as the *only permanent cure.* They stop Chills and Fever the first day, and do not sicken the stomach or operate on the bowels. All of the above-named truly valuable Pills are for sale in almost every town and village in North and South Carolina. In Raleigh, by

WILLIAMS & HAYWOOD and H. D. TURNER.

M'ALLISTER'S OINTMENT.

If popular opinion is any criterion of the worth of an article, we could furnish the names of a great many persons who have been cured by M'Allister's All-healing Ointment.

It is not too much to say, that this Ointment is doing great good in this city and elsewhere. The various diseases that are cured, which were supposed to be overcome only by internal remedies, yield at once to the power of this Ointment. The principle on which it ever acts, viz: *a radical restoration of the Insensible Perspiration,* is the great secret of its success. As most diseases originate in a common cold, induced by closing the pores upon the surface, it follows that if by any means the pores can be reopened, and the Insensible Perspiration restored, the vile and morbid humors of the body will escape, and no cause of sickness remain.

M'Allister's All-healing Ointment has now been proved to be the ONLY preparation known to effect this result.

We would remark that some of the following complaints have been of long standing, even twenty years—one case of forty years—many of them of five and ten years: such cases as the sick headache, for instance, a complaint supposed to yield only to internal remedies, have been cured directly; also Rheumatism, Cold Feet, Liver Complaint, Consumption, Asthma, all Diseases of the Chest, Sores, and the like, have been cured; while others who are taking balms, balsams, a little sugar-candy, pills, and drugs, are yet suffering, with little hopes of recovery. We speak these things more in sorrow than in anger, because we feel and know that health and life are dear to every one. Persons should cease being blinded to these things so long as there is no evidence of good. What will not a man give for his life?

If we had the names of all who have been benefited or cured by the All-healing Ointment within the last six months, we could cover over the whole broadside of a meeting-house with their number. But we know our friends will tell it to their friends, and they in turn will whisper it to theirs, and thus the good thing will go round, while thus more than twice ten thousand hearts will leap for joy, in the good received from this ointment. Friends! cheer us on in this good work, by speaking the whole truth to your neighbors and acquaintance, and let this *great and good medicine* find its way into every house, and gladden the heart of every soul in the land.

This All-healing Ointment SURPASSES all other remedies for disease, because no other medicines can equal it in OPENING the PORES of the SKIN, and thus restoring the INSENSIBLE PERSPIRATION.

CAUTION.—No Ointment will be genuine unless the names of James M'Allister & Co. are written with a pen upon every label!

Now we hereby offer a reward of $500, to be paid on conviction in any of the constituted Courts of the United States, of any individual counterfeiting our name and Ointment.

☞ The above invaluable remedy is for sale at the North Carolina Bookstore, by the subscriber, and by no other person in this city.

Price 50 Cents. **H. D. TURNER.**

NATURE'S OWN REMEDY.

THE INVALID'S BEST FRIEND.

Warranted free from Mercury and all mineral substances.

The original and only genuine Indian medicine.

This truly great and good medicine is now introduced into nearly every section of the United States. It has long enjoyed a reputation as decidedly the best FAMILY and PLANTATION medicine in existence. By its timely use, all may preserve health uninterrupted for a long series of years, and be saved not only the danger but the expense of sickness.

In the BILIOUS diseases peculiar to the climate, this medicine has no equal. Its operation is at once easy and efficacious, rarely disturbing the rest of the most delicate.

This medicine will thoroughly break up FEVER AND AGUE, or chills and fever, if used according to directions; so much is it valued in this disease, that it is fast superseding all other medicines.

In FEMALE COMPLAINTS, the above Pills are beyond all praise. Many a lovely wreck has been restored to health through its agency, when everything else failed to afford relief. In Philadelphia, these Pills are deemed indispensable in nearly every family.

Persons can rarely go amiss in the use of this medicine. It is so compounded as to be useful in nearly every complaint, and infallible in all those which arise from derangement of the stomach and bowels. No particular care is requisite in taking it, except what is suggested by plain common sense. No danger need be apprehended from diet or exposure to the weather. The Pills may be taken in the morning, at noon or night, as is most convenient, or whenever sickness may require, though it is recommended to take them on going to bed at night as preferable to any other period.

Whoever uses this medicine *once* will need no persuasion to induce him to resort to it ever afterwards. He will acknowledge voluntarily, as thousands have done, that it is the best he ever used.

Price 25 cents per box, or five boxes for $1. For sale genuine, wholesale and retail, by H. D. TURNER, *Raleigh*,
GEO. R. FRENCH, *Wilmington*,
and by agents in all parts of the State.

Offices devoted exclusively to the sale of WRIGHT'S INDIAN VEGETABLE PILLS, wholesale and retail, 169 Race Street, Philadelphia; 288 Greenwich Street, New York; and 198 Tremont Street, Boston.

DUNDEE, Yates Co., N. Y., S. H. WRIGHT.
July 1, 1856.

THE MANY THINGS THAT ADAM MISSED ARE HERE ENUMERATED.

Adam never knew what 'twas to be a boy,
To wheedle pennies from a doting sire,
With which to barter for some pleasing toy,
Or calm the rising of a strong desire.

To suck an orange. Nor did he
E'er cast the shuttlecock to battledore,
Nor were his trowsers ever out at knee,
From playing marbles on the kitchen floor.

He never skated o'er the frozen rill,
When winter's covering o'er the earth was spread;
Nor glided down the slippery hill,
With pretty girls upon his trusty sled.

He never swang upon his father's gate,
Or slept in sunshine on the cellar door,
Nor roasted chestnuts at the kitchen grate,
Nor spun his humming top upon the floor.

He ne'er amused himself with rows of bricks,
So set, if one fall, all come down;
Nor gazed delighted at the funny tricks
Of harlequin or travelling circus clown.

By gradual growth he never reached the age
When cruel Cupid first invokes his art,
And stamps love's lesson, page by page,
On the glowing tablets of a youngling's heart.

He never wandered forth on moonlight nights,
With her he loved above all earthly things.
Nor tried to mount old Pindus's rocky heights,
Because he fancied love had lent him wings.

He never tripped it o'er the ball-room floor,
Where love and music intertwine the charms,
Nor wandered listless by the sandy shore,
Debarred the pleasures of his lady's arms.

For Adam—so at least 'tis said,
By many an ancient and modern sage,
Before a moment of his life had fled,
Was fully *thirty years of age.*

WEALTH.

What makes all doctrines plain and clear?
About two hundred pounds a year.
And that which was prov'd true before,
Prove false again? two hundred more.

A LAUGHABLE circumstance connected with the equestrian statue of Peter the Great recently occurred at St. Petersburg. Some American sailors, who had been making rather too free with "the jolly god," sallied forth on a frolicsome cruise; and one of them, not having the fear of the police before his eyes, climbed over the wire palisade surrounding the statue, and, clambering up the rock, seated himself, *en croupe*, behind the czar! He was speedily dismounted, and after a night's confinement was brought before the divisional officer of police, when the case was summarily disposed of, and so heavy a fine inflicted that the offender naturally remonstrated. "No, no," replied the officer, "we can make no abatement: if you will ride with great people, you must pay great people's prices!"

HONOR AMONG THE GREEKS AND ROMANS.—As to the divers usage of our giving the lie, and the laws of honor in that case, and the alterations they have received, I shall defer saying what I know of them to another time; and shall learn, if I can, in the mean time, at what time the custom took beginning, of so exactly weighing and measuring words, and of making our honors so interested in them; for it is easy to judge that it was not anciently amongst the Greeks and Romans; and I have often thought it strange to see them rail at and give one another the lie without any farther quarrel. Their laws of duty steered some other course than ours. Cæsar is sometimes called thief, and sometimes drunkard, to his teeth. We see the liberty of invectives they uttered against one another, among the greatest war chiefs of both nations, where words are only revenged with words, and never lead to anything else.—*Montaigne.*

ANECDOTE OF SWIFT.—"Dr. Swift has an odd, blunt way, that is mistaken, by strangers, for ill nature. 'Tis so odd, that there is no describing it but by facts. I'll tell you one that first comes into my head. One evening, Gay and I went to see him: you know how intimately we were all acquainted. On our coming in, 'Heyday, gentlemen,' says the doctor, 'what's the meaning of this visit? How came you to leave all the great lords, that you are so fond of, to come hither to see a poor dean?' 'Because we would rather see you than any of them.' 'Ay, any one that did not know so well as I do, might believe you. But since you are come, I must get some supper for you, I suppose.' 'No, doctor, we have supped already.' 'Supped already? that's impossible! Why, 'tis not eight o'clock yet. That's very

strange! but, if you had not supped, I must have got something for you. Let me see, what should I have had? A couple of lobsters; ay, that would have done very well—two shillings; tarts, a shilling. But you will drink a glass of wine with me, though you supped so much before your usual time only to spare my pocket?' 'No; we had rather talk with you than drink with you.' 'But if you had supped with me, as in all reason you ought to have done, you must have then drunk with me. A bottle of wine, two shillings—two and two is four, and one is five; just two-and-six-pence a piece. There, Pope, there 's half a crown for you, and there 's another for you, sir; for I won't save anything by you, I am determined.' This was all said and done with his usual seriousness on such occasions; and, in spite of everything we could say he obliged us to take the money."

"In an odd number of the European Magazine, an anecdote is related of an old gentleman who used to walk out every afternoon, with a gold-headed cane, in the fields opposite Baltimore House, which were then open, only with foot-paths crossing them. He was frequently accosted by a beggar with a wooden leg, to whom he gave money, which only made him more importunate. One day, when he was more troublesome than usual, a well-dressed person happening to come up, and observing how saucy the fellow was, said to the gentleman, 'Sir, if you will lend me your cane for a moment, I'll give him a good thrashing for his impertinence.' The old gentleman, smiling at the proposal, handed him his cane, which the other no sooner was going to apply to the shoulders of the culprit, than he immedi-

ately whipped off his wooden leg, and scampered off with great alacrity, and his chastiser after him as hard as he could go. The faster the one ran the faster the other followed him, brandishing the cane, to the great astonishment of the gentleman who owned it, till having fairly crossed the fields, they suddenly turned a corner, and nothing more was seen of either of them."

A young man in one of our western towns has patronized the fine arts so far as to buy a picture of the Temptation of Adam and Eve. Some one asked him if it was a chaste picture. "Why, yes," he said, "chased by a snake."

Lord Byron's apostrophe to the Lake of Geneva is exquisitely beautiful:—

Clear, placid Leman! thy contrasted lake,
With the wild world I dwelt in, is a thing
Which warns me, with its stillness, to forsake
Earth's troubled waters for a purer spring.
This quiet sail is as a noiseless wing
To waft me from distraction; once I loved
Torn ocean's roar, but thy soft murmuring
Sounds sweet as if a sister's voice reproved,
That I with stern delights should e'er have been so moved.

WHAT THE YOUNG MAN SAW IN BROADWAY.

I stood on the steps of the Astor,
And gazed at the living tide
Of vehicles down the middle,
And people up either side.
And I saw a maid who was "pumpkins"
In a shawl of real Cashmere,
Jump down from the step of a carriage,
While her robe got caught in the rear.

Oh! the robe was of *moire antique*,
(A very expensive "rag;")
But a skirt peep'd out below it,
And *that* was a coffee-bag.
I knew it had once held coffee,
Though now 'twas another thing;
For on it was "*Fine old Java*,"
Y-mark'd in store black-ing
And I thought as she gained the sidewalk,
And the "muslin" again was furl'd,
How much those out-skirts and *in*-skirts
Were like man's heart in the world;

How many a Pharisee humbug
Plays a lifelong game of brag;
His words all silk and velvet,
And his heart but a coffee-bag!
And I turned me into the Astor,
For my heart was beginning to sink,
And I told the tale to my brother,
And it rang him in for a drink.
It rang him in for cocktails,
And then to myself I confess'd,
When I thought how I came by the "ardent,"
That I was as bad as the rest.

How sweet, when labors close,
To gather round an aching breast
The curtain of repose!

LAUGHTER.—You cannot force people to laugh: you cannot give a reason why they should laugh: they must laugh of themselves, or not at all. As we laugh from a spontaneous impulse, we laugh the more at any restraint upon this impulse. We laugh at a thing merely because we ought not. If we think we must not laugh, this perverse impediment makes our temptation to laugh the greater; for, by endeavoring to keep the obnoxious image out of sight, it comes upon us more irresistibly and repeatedly; and the inclination to indulge our mirth, the longer it is held back, collects its force, and breaks out the more violently in peals of laughter.—*Hazlitt.*

For forms of faith, let senseless bigots fight;
He can't be wrong who's always in the right.

OF COURSE NOT.—An old stick says: "I have seen women so delicate that they were afraid to ride, for fear of the horse running away—afraid to sail, for fear the boat might upset—afraid to walk, for fear that the dew might fall—but I never saw one afraid to be married."

A HORSE FLY.—Two gentlemen, who were angling in the Severn, near Shrewsbury, lately, could not agree upon the appearance of the horse-fly, and agreed to refer the question to a rustic whom they saw ploughing near them, and accosted him thus: "Did you ever see a horse-fly?"

"Why," said Hodge, scratching his upper story, "Noa, drat it—I never seed a horse fly, but I once seed a cow fall over a steep bank."

INTERNAL IMPROVEMENT BOARD.

The Internal Improvement Board is composed as follows:—

His excellency, Thomas Bragg, President, *ex officio;* Calvin Graves, of Caswell, and N. E. Canaday, of Granville.

STATE LIBRARIAN.

Oliver H. Perry, of Raleigh.

POST-OFFICE REGULATIONS.

Among the regulations just issued by the Postmaster-General, to carry out the recent laws of Congress, are the following:—

All *newspapers* transmitted through the mails will be hereafter rated with postage, except exchange papers between the publishers of newspapers, and those franked by persons enjoying the privilege; and contractors may take newspapers out of the mails for sale or distribution among subscribers.

Transient newspapers, or those not sent from the office of publication to subscribers, handbills, or circular letters, printed or lithographed, not exceeding one sheet in size, will pay one cent upon delivery at the office, and before they are put in the mail, and all such will be charged by postmasters as prepaid matter, in the way-bills, and upon the account of mails sent, and stamped or marked "paid," with the name of the office from which sent.

NEW POSTAGE LAW.

Rates of Newspaper Postage.—The new amendment to the postage law which went into operation on the 30th of September, 1852, fixes the rate of each newspaper, periodical, circular, or other printed matter, not exceeding three ounces, at one cent, to any part of the United States; for each additional ounce, or fraction, one cent; when paid yearly, or quarterly, in advance, at the office where delivered, only one-half this rate to be charged. Newspapers and periodicals not exceeding one ounce and a half, to be charged only one-half the above rates in the States where published. Packages of several small newspapers or pamphlets, of not more than sixteen octavo pages, to one address, to be charged only half a cent an ounce. The postage on all transient matter to be prepaid, or charged double these rates.

Books, bound or unbound, are to be deemed mailable, when not weighing over four pounds, and chargeable with one cent an ounce for under 3000 miles; and two cents for over that distance—fifty per cent. to be added when not prepaid.

Publishers of newspapers and periodicals are permitted to send exchange copies, and to inclose bills and receipts free of postage.

Rates of Letter Postage.—The rates of letter postage between places in the United States, and also between the United States and Canada, are as follows:—

	UNITED STATES.		CANADA.	
	For not over 3000 miles.	For over 3000 miles.	To and from Canada, for not over 3000 miles.	For over 3000 miles.
Weighing half an ounce or under, being the single rate,	cts. 3	cts. 6	cts. 10	cts. 15
Over half an ounce and not over one ounce,	6	12	20	30
Over one ounce and not over one and a half,	9	18	30	45
Over one and a half ounce and not over two,	12	24	40	60
Over two ounces and not over two and a half,	15	30	50	75

All letters must be prepaid, or they will not be sent.

The Congress of the United States consists of a Senate and House of Representatives, and must assemble at least once every year, on the first Monday in December, and also at the call of the President by proclamation.

The Senate is composed of two members from each State, which are chosen by the Legislatures of the several States, for the term of six years, one-third of them being elected biennially.

The Vice-President of the United States is the President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. In his absence, a President *pro tempore* is chosen by the Senate.

The House of Representatives is composed of members from the several States, elected by the people for two years. The Representatives are apportioned among the different States according to population.

The present ratio, according to the new apportionment, is one member for every 70,680 souls in each State, making the whole number of members 233.

The compensation of each member of the Senate and House of Representatives is $3,000 per session, or $6,000 for each Congress, and $8 for every twenty miles travel in the usual road, in going to, and returning from the seat of Government.

The number of Electors of President and Vice-President, under the new apportionment, will be 275, [instead of 294, as in 1819,] of whom 138 will be necessary for a choice.

The Government of the United States is represented by Ministers Plenipotentiary at the Courts of Great Britain, France, Russia, Prussia, Austria, Spain, Brazil, and Mexico; and by Charges d'Affaires at the courts of most of the other foreign countries with which this country is much connected by commercial intercourse.

The pay of Ministers Plenipotentiary is $9,000 per annum, as a salary, besides $9,000 for outfit. The pay of Charges d'Affaires is $4,500 per annum; of Secretaries of Legation, $2,000; of Ministers Resident, $5,000.

CUTTING GRASS AND GRAIN EARLY.

It is now pretty well established, not only on chemical principles, but by oft-repeated experiment and observation, that all crops designed as food for man or beast should be gathered before full maturity. Grass, while still green, contains a large proportion of starch, sugar, and gum, which furnish direct nutriment; but these substances are changed to hard indigestible, woody fibre as the crop ripens. The same holds true of all kinds of grain. Every one is familiar with the sweet taste of soft corn or wheat, owing to the amount of sugar contained at that period of growth. Gum and starch are likewise abundant. If the maturing process be suddenly arrested at this period, these substances are preserved unchanged, while, if allowed to fully ripen, a considerable portion of them is transferred into the hard, woody husk or bran. The main point to be looked to

is, not to cut grain before sufficient maturity is attained to prevent shrinkage or a loss of weight. Seed grain may well be left to its natural ripening upon the stalk.

Grass should be cut as soon as the seed is set, or immediately after flowering is over—clover should be cut soon after the full bloom is attained.

A large number of experiments on wheat point to about ten days before full maturity as the best time for cutting. One of the best set of experiments we have seen recorded was made by an English farmer, Mr. HANNAM, of Yorkshire. He made five successive cuttings from the same field, with the following results:—

CUTTINGS.	DAYS BEFORE MATURITY.	PRODUCTS OF 100 LBS. OF GRAIN.		
		Fine Flour.	Seconds.	Bran.
1	30 days.	75 lbs.	7 lbs.	17 lbs.
2	21 days.	76 lbs.	7 lbs.	16 lbs.
3	14 days.	80 lbs.	7 lbs.	13 lbs.
4	2 days.	77 lbs.	7 lbs.	14 lbs.
5	0 day.	72 lbs.	11 lbs.	15 lbs.

We have not at hand the relative weight of grain gathered at each cutting, but other experiments give also the largest cuttings corresponding with No. 3. In the above example the flour from No. 3 was superior to the others. A practical rule for gathering wheat, corn, and other grains, is to commence the cutting just when the kernels will yield to a moderate pressure between the thumb nails.

RALEIGH, 1857.

GUNN'S DOMESTIC MEDICINE.

This book points out, in plain language, free from doctors' terms, the Diseases of Men, Women, and Children, and the latest and most improved means used in their cure, and is intended expressly for the benefit of families. It also contains descriptions of the MEDICAL ROOTS AND HERBS OF THE UNITED STATES, and how they are to be used in the cure of diseases. It is arranged on a new and simple plan, by which the practice of Medicine is reduced to principles of common sense.

This invaluable book has passed through many editions; it has now been revised and improved in every respect, and enlarged to nearly double its former size; and contains nine hundred octavo pages.

It does not propose to dispense with physicians in severe cases; but it does propose to save thousands and tens of thousands annually, by putting the means of cure into every man's hands, and of saving many valuable lives (which is of far more importance), by instructing individuals how to check disease in its beginnings, before it has acquired too much strength to resist and overcome.

BEACH'S AMERICAN PRACTICE,

OR

FAMILY PHYSICIAN;

Being the Scientific System of Medicine on Vegetable Principles.

Designed for the use of Families and Physicians.

COMPLETE IN ONE VOLUME,

Illustrated with nearly two hundred engravings.

BY W. BEACH, M. D.

This incomparable book, which has passed through seventeen editions of forty thousand each, embraces the character, causes, symptoms, and treatment of the diseases of men, women, and children of all climates, and comprehends the entire range of Hygiene, Medicine, Surgery, Midwifery, Materia Medica, and Pharmacy, which are illustrated with nearly two hundred engravings, nearly one hundred of which are colored engravings of plants.

These doctrines have guided my practice many years, and experience has taught me not to distrust their truth, safety, and value.

Every one may be his own doctor at a cheap rate, and enjoy a sound mind in a sound body. The remedies grow around your own doors.

DR. STRONG'S COMPOUND SANATIVE PILLS.

These Pills are entirely Vegetable, and are a most superior Medicine in the cure of all *Bilious Complaints, Chills and Fever, Dyspepsia, Costiveness, Liver Complaint, Jaundice, Sick Headache, Scrofula, Salt Rheum, Fevers of all kinds, Loss of Appetite, Obstructed and painful Menstruation. and all lingering diseases.*

As a Female Medicine they act like a charm, and when taken according to the directions, they never fail to cure the worst cases of **Piles,** after all other remedies fail.

They purify the blood, equalize the circulation, restore the Liver, Kidneys, and other Secretory Organs to a healthy tone, and action; and as an Antibilious Family Medicine they have no equal. Price 25 cents per box.

Also.

DR. STRONG'S PECTORAL STOMACH PILLS.

A remedy for Coughs, Colds, Catarrh, Bronchitis, Croup, Hooping Cough, Asthma, Consumption, Nervous Diseases, Dyspepsia, Costiveness, Erysipelas, Disease of the Heart, Inflammation and Pain in the Chest, Back and Side, and all diseases arising from a deranged state of the Stomach, and to relieve the distress and bad feeling from eating too hearty food, in weak and dyspeptic habits.

WARRANTED TO BE PURELY VEGETABLE.

These Pills act as an Expectorant, Tonic, and Aperient. One 25 cent box possesses three times more power to cure diseases than a one dollar bottle of any of the Syrups, Balsams, or Sarsaparillas that was ever made, and a simple trial of only one box will prove this important truth.

They promote Expectoration, Loosen the Phlegm, and Clear the Lungs and other Secretory Organs of all morbid matter, and there is not another remedy in the whole Materia Medica capable of imparting such healing properties to the Lungs and Vital Organs as these Pills, **They cure Costiveness, produce a good, regular Appetite, and strengthen the System.**

Price 25 cents per box, containing 25 doses of Medicine.

Call on the Agents who sell the Pills, and get the *Planter's Almanac* GRATIS, giving full particulars and certificates of cures.

DR. SPENCER'S VEGETABLE PILLS.

Time, which "tries all things," has thoroughly established the inestimable value of these Pills as a Cathartic, Antibilious and Detergent Medicine. Their reputation, founded on long experience, still continues to increase. They may truly be termed the *great household Medicine of the South and West.* No other pills have been so widely patronized in those regions. They are purely vegetable in their nature, and so mild and gentle in their operation that they may be given with perfect safety, even to an infant. Females can use them at all periods with perfect safety. They act like a charm in every species of complaint affecting the Stomach and Bowels. Price 25 cents per box.

DR. HULL'S VEGETABLE FEVER AND AGUE PILLS.

Among all the advertised remedies of the day for Ague and Fever, or Chill and Fever none seem to give so much general satisfaction as DR. HULL'S CELEBRATED PILLS. Wherever they have been introduced, *Dr. Hull's Ague Pills* have been received as the *only permanent cure.* They stop Chills and Fever the first day, and do not sicken the stomach or operate on the bowels. All of the above-named truly valuable Pills are for sale in almost every town and village in North and South Carolina. In Raleigh, by

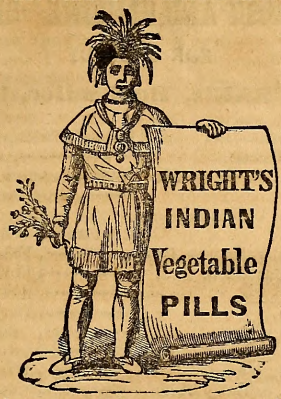
NATURE'S OWN REMEDY.

THE INVALID'S BEST FRIEND.

Warranted free from Mercury and all mineral substances.



The original and only genuine Indian medicine.

This truly great and good medicine is now introduced into nearly every ction of the United States. It has long enjoyed a reputation as decidedly e best FAMILY and PLANTATION medicine in existence. By its timely e, all may preserve health uninterrupted for a long series of years, and saved not only the danger but the expense of sickness.

In the BILIOUS diseases peculiar to the climate, this medicine has no ual. Its operation is at once easy and efficacious, rarely disturbing the st of the most delicate.

This medicine will thoroughly break up FEVER AND AGUE, or chills and ver, if used according to directions; so much is it valued in this disease, at it is fast superseding all other medicines.

In FEMALE COMPLAINTS, the above Pills are beyond all praise. Many a ely wreck has been restored to health through its agency, when everying else failed to afford relief. In Philadelphia, these Pills are deemed dispensable in nearly every family.

Persons can rarely go amiss in the use of this medicine. It is so comunded as to be useful in nearly every complaint, and infallible in all those ich arise from derangement of the stomach and bowels. No particular re is requisite in taking it, except what is suggested by plain common nse. No danger need be apprehended from diet or exposure to the ather. The Pills may be taken in the morning, at noon or night, as is st convenient, or whenever sickness may require, though it is recomended to take them on going to bed at night as preferable to any other riod.

Whoever uses this medicine *once* will need no persuasion to induce him resort to it ever afterwards. He will acknowledge voluntarily, as thouds have done, that it is the best he ever used.

ECLIPSES IN THE YEAR 1859.

There will be six Eclipses this year, as follows:—

I. A Partial Eclipse of the Sun, Feb. 2, invisible in the United States.

II. A Total Eclipse of the Moon, Feb. 17, early in the morning, visible. It begins at Raleigh at 3 o'clock 42m., becomes *total* at 4h. 39m., and remains total until 6h. 17m., when the eastern limb of the Moon begins to appear. The Moon sets at 6h. 52m., or some 6 minutes *after* the Sun has risen, and with about $\frac{1}{3}$ of it eclipsed at that time. In a *good horizon*, the eclipse may be seen by *sunlight*, a rare occurrence.

III. A Partial Eclipse of the Sun, March 4, invisible in the United States.

IV. A Partial Eclipse of the Sun, July 29, in the afternoon. This Eclipse may be visible in the Northern States, but *very small*, and will last only a few minutes, and occurs about an hour before sunset. Visible in N. E. and the Northern and Middle States. Invisible in North Carolina.

V. Total Eclipse of the Moon, Aug. 13, invisible in the United States.

VI. Partial Eclipse of the Sun, Aug. 28, invisible in the United States.

An Indian came to a certain "agency" in the northern part of Iowa, to procure some whiskey for a young warrior, who had, as he said, been bitten by a rattlesnake. At first the agent did not credit his story, but the earnestness of the Indian and the urgency of the case overcame his scruples, and, turning to get the liquor, he asked the Indian how much he wanted.

"Four quarts, answered the Indian.

"Four quarts?" asked the agent, in surprise; "so much as that?"

"Yes," replied the Indian, speaking through his set teeth, and frowning as savagely as though about to wage a war of extermination on the whole snake tribe, "four quarts—*snake very big.*"

AN OBSTINATE CUSTOMER.—"Are you an Odd Fellow?"
"No, sir; I've been married a week."
"I mean, do you belong to the Order of Odd Fellows?"
"No; I belong to the Order of Married Men."
"Thunder! how dumb! Are you a Mason?"
"No; I'm a carpenter."
"Worse and worse! Are you a Son of Temperance?"
"Confound you, no! I am a son of Mr. John Gosling."
The querist went his way.

"My boy, what does your mother do for a living?" was asked of a little barefooted urchin. "She eats cold vittles, sir."

BEE-STING AND TOOTHACHE.—The pain of a bee-sting may be at once relieved, and the subsequent swelling prevented, by wetting the part with spirits of hartshorn (water of ammonia). The sting is hollow, and there is a little cup of poison at its root that is driven through it by the pressure of its insertion, and deposited in the wound. The poison is said to be of an acid nature, and to be destroyed by this volatile alkali.

The pain of toothache, also, is relieved oftener by a few drops of hartshorn on a bit of lint inserted into the cavity of the tooth, than by any other application. Keep a vial of it, well corked, in the house, and if you are fortunate enough to need it for nothing else, use it to restore the color destroyed by fruit stains.—*American Agriculturist.*

HOW TO MEND CHINA.—From an English almanac we, a long time since, cut a receipt for mending china, and the opportunity having occurred for trying, we found it admirable, the fracture scarcely being visible after the article was repaired. It is thus made: Take a very thick solution of gum arabic in water, and stir it into plaster of Paris until the mixture becomes a viscous paste. Apply it with a brush to the fractured edges and stick them together. In three days the article cannot again be broken in the same place. The whiteness of the cement renders it doubly valuable.

"I would do anything to gratify you, I would go to the end of the world to please you," said a fervent lover to the object of his affections. "Well, sir, go there, and stay, and I shall be pleased."

A young lawyer who had paid his court to a young lady without much advancing, accused her one day of being insensible to the power of love. "It does not follow," she replied, "that I am not to be won by the power of an attorney."

"Sure, and I'm heir to an immense estate under my father's will. When he died he ordered my elder brother to divide the house with me; and, by St. Patrick, he did it—for he tuck the inside himself, and gave me the outside."

It was said that one of the editors of a New Orleans paper, soon after commencing to learn the printing business, went to see a preacher's daughter. The next time he attended meeting he was considerably astonished at hearing the minister announce as his text, "My daughter is grievously tormented with a devil."

"John, did you find any eggs in the old hen's nest this morning?" "No, sir. If the old hen laid any, she mislaid them."

"He who feels his own deficiencies will be a charitable man for his own sake."

"WASN'T that a waste of powder?" said an Irishman to a Kentuckian, who had just brought a coon to the ground with his rifle, from a large tree.

"Why so, Pat?" asked the hunter.

"Sure, the fall would a kilt him."

"BILLY, how did you lose your finger?"

"Easily enough," said he.

"I suppose you did; but how?"

"I guess you'd lost yours if it had been where mine was."

"But that don't answer the question."

"Well, if you must know, I had to cut it off, or else steal the trap!" said Billy.

GOOD RULES FOR ALL.—Profane swearing is abominable. Vulgar language is disgusting. Loud laughing is impolite. Inquisitiveness is offensive. Tattling is mean. Telling lies contemptible. Slandering is devilish. Ignorance is disgraceful, and laziness is shameful. Avoid all the above vices, and aim at usefulness. This is the road in which to become respectable. Walk in it. Never be ashamed of honest labor. Pride is a curse—a hateful vice. Never act the hypocrite. Keep good company. Speak the truth at all times. Never be discouraged, but persevere, and mountains will become mole-hills.

Why is a rum-seller like a butcher? Do you give it up? Because the *better* his business is the more he *kills*.

TO EXTINGUISH.—An Irishman being on a visit to some of his relatives, a little more polished than himself, was, on going to bed, requested to be careful to *extinguish* the candle. He was obliged to ask the meaning of the word, when he was told it was to put it out. He treasured up the term, and one day he was sitting at home with his wife, enjoying his potatoes and buttermilk, when a pig unceremoniously walked in; whereupon he said, proud of his bit of learning—

"Judy, dear, will you extinguish the pig?"

"Arrah now, Pat, my honey, what do ye mane?" inquired Judy.

"Musha, then, you ignorant crathur," replied Pat, "it manes to put him out, to be sure."

For frosted feet, deer's marrow will be found excellent. For chilblains, tincture of iodine; also muriatic acid, frequently applied, will relieve them.

WEATHER PROVERBS.—The following cutting from one of the Glasgow "Penny Almanacs" for this year, will be found generally so true and useful in its observations, as not unworthy of being copied:—

"WEATHER WISDOM.—A rainbow in the morning gives the shepherd warning. That is, if the wind be easterly; because it shows the cloud is approaching the observer.

A rainbow at night is the shepherd's delight. This is also a good sign, provided the wind be westerly, as it shows that the rain clouds are passing away.

Evening red and next morning gray, are certain signs of a beautiful day.

When the glow-worm lights her lamp, the air is always damp.

If the cock goes crowing to bed, he'll certainly rise with a watery head.

CURE FOR CHAPPED HANDS.—Instead of washing the hands with soap, employ oatmeal; and, after each washing, take a little dry oatmeal, and rub over the hands, so as to absorb any moisture.

When you see gossamer flying, be ye sure the air is drying.
When black snails cross your path, black clouds much moisture hath.
When the peacock loudly bawls, soon we'll have both rain and squalls.
When ducks are driving through the burn, that night the weather takes a turn.
If the moon shows like a silver shield, be not afraid to reap your field.
But if she rises haloed round, soon we'll tread on deluged ground.
When rooks fly sporting high in air, it shows that windy storms are near.
If at the sun rising or setting, the clouds appear of a lurid red color, extending nearly to the zenith, it is a sure sign of storms and gales of wind."

The Congress of the United States consists of a Senate and House of Representatives, and must assemble at least once every year, on the first Monday in December, and also at the call of the President by proclamation.

The Senate is composed of two members from each State, which are chosen by the Legislatures of the several States, for the term of six years, one-third of them being elected biennially.

The Vice-President of the United States is the President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. In his absence, a President *pro tempore* is chosen by the Senate.

The House of Representatives is composed of members from the several States, elected by the people for two years. The Representatives are apportioned among the different States according to population.

The present ratio, according to the new apportionment, is one member for every 70,680 souls in each State, making the whole number of members 233.

The compensation of each member of the Senate and House of Representatives is $3,000 per session, or $6,000 for each Congress, and $8 for every twenty miles travel in the usual road, in going to and returning from the seat of Government.

The number of Electors of President and Vice-President, under the new apportionment, will be 296, of whom 149 is necessary for a choice.

The Government of the United States is represented by Ministers Plenipotentiary at the Courts of Great Britain, France, Russia, Prussia, Austria, Spain, Brazil, and Mexico; and by Charges d'Affaires at the courts of most of the other foreign countries with which this country is much connected by commercial intercourse.

The pay of Ministers Plenipotentiary is $9,000 per annum, as a salary, besides $9,000 for outfit. The pay of Charges d'Affaires is $4,500 per annum; of Secretaries of Legation, $2,000; of Ministers Resident, $5,000.

GUNN'S DOMESTIC MEDICINE.

This book points out, in plain language, free from doctors' terms, the Diseases of Men, Women, and Children, and the latest and most improved means used in their cure, and is intended expressly for the benefit of families. It also contains descriptions of the MEDICAL ROOTS AND HERBS OF THE UNITED STATES, and how they are to be used in the cure of diseases. It is arranged on a new and simple plan, by which the practice of Medicine is reduced to principles of common sense.

This invaluable book has passed through many editions; it has now been revised and improved in every respect, and enlarged to nearly double its former size; and contains nine hundred octavo pages.

It does not propose to dispense with physicians in severe cases; but it does propose to save thousands and tens of thousands annually, by putting the means of cure into every man's hands, and of saving many valuable lives (which is of far more importance), by instructing individuals how to check disease in its beginnings, before it has acquired too much strength to resist and overcome.

OR

FAMILY PHYSICIAN;

Being the Scientific System of Medicine on Vegetable Principles.

Designed for the use of Families and Physicians.

COMPLETE IN ONE VOLUME,

Illustrated with nearly two hundred engravings.

BY W. BEACH, M. D.

This incomparable book, which has passed through seventeen editions of thirty thousand each, embraces the character, causes, symptoms, and treatment of the diseases of men, women, and children of all climates, and comprehends the entire range of Hygiene, Medicine, Surgery, Midwifery, Materia Medica, and Pharmacy, which are illustrated with nearly two hundred engravings, nearly one hundred of which are colored engravings of plants.

These doctrines have guided my practice many years, and experience has taught me not to distrust their truth, safety, and value.

Every one may be his own doctor at a cheap rate, and enjoy a sound mind in a sound body. The remedies grow around your own doors.

CUSTOMARY NOTES.

VENUS will be Evening Star until July 18, then Morning Star the rest of the year. MARS will be Morning Star until July 17, then Evening Star the rest of the year. JUPITER will be Morning Star until January 10, then Evening Star until July 29, then Morning Star the rest of the year. SATURN will be Morning Star until February 11, then Evening Star until August 22, then Morning Star the rest of the year.

MERCURY will be in a favorable position for visibility in the west soon after sunset about March 13, July 10, and November 4; also in the east before sunrise about January 6.

ECLIPSES FOR THE YEAR 1860.

There will be four Eclipses this year, two of the Sun and two of the Moon, as follows:—

I. An Annular Eclipse of the Sun, January 22, invisible in America.

II. A Partial Eclipse of the Moon, February 6, in the evening, visible. Size, 9.744 digits on the northern limb. At Raleigh it begins at 7h. 48m. eve. Largest at 9h. 14m., and ends at 10h. 40m. For other places than Raleigh, the times will be found by adding the longitude in *time*, east of Raleigh, and subtracting where it is west of the same.

III. A Total Eclipse of the Sun, July 18, in the morning. This will be a *partial* eclipse in the United States. At Raleigh it begins at 6h. 51m. morn., and ends at 8h. 24m. Size in the Southern States, from 3 to 5 digits.

IV. A Partial Eclipse of the Moon, August 1, invisible in America.

RETURN TO B. R. LACY,
STATE TREASURER

OCCULTATION.

VENUS will be occulted by the Moon, on the 24th of April; visible generally throughout the country. The planet will disappear behind the Moon at 8h. 33m. eve., and reappear at 9h. 3m. at Washington, and about 7 minutes earlier at Raleigh.

NOTE.—The calculations of this Almanac have been made exclusively for it. The Sun Rising and Setting are adapted to *apparent time*, this being most in use. All the other tables are in *clock time*. The column of *Moon's Place* shows the Signs of the Zodiac or Constellation of Stars in which the Moon is situated at noon.

CURE FOR THE CRAMP.

To those who are troubled with cramp
  In the leg—and I fear there are many—
I can offer a positive cure;
  And as simple and easy as any.
A bandage sufficiently strong
  For the purpose is all that's required;
Which, tied tight just over the knee,
  Will produce the effect so desired;
For the pain in a short time will cease,
  And permit you to sleep with some pleasure.
One trial will prove that I've said
  Not a word that's untrue of this treasure.

The villages of New England are among the pleasantest in the world, and the chief secret of their charm is summed up in one word: TREES. The people who laid them out a century or two ago, had the good sense to plant a few score of young trees about the green and along the streets. Now, look at them! Glorious elms arch the streets, and envelop the place in shade. The meanest cottage is pleasant and picturesque if it stands beneath a fine old tree. The poorest village is good to live in if it nestles under giant trees. Plant trees. Plant them round the school house. Plant them round the church. Plant them on the common. Plant them along the street. Make all the villages and towns pleasant with trees.

FASHIONABLE CHIT-CHAT.—The boarders in one of the fashionable houses in Boston were assembled in the public parlor one stormy evening, when a rather antiquated maiden lady, who never seems to have any employment but admiring her jewelry and dresses, lisped out the remark that she loved a rainy day, and always availed herself of it to arrange her drawers. "So do I," growled an old sea captain, "I overhaul my drawers and shirts too, sometimes, and sew a button or a string where it is wanted." Mademoiselle did not faint, but there was an angry rustle of silks, as she swept out of the room, leaving all to exchange a suppressed titter for a good hearty laugh.

Woman loves with her heart; man with his head.

A BEAUTIFUL PARAGRAPH.—O man! fear not for thy affections, and feel no dread lest time should efface them. There is neither to-day nor yesterday in the powerful echoes of memory; there is one always. He who no longer feels has never felt. There are two memories—the memory of the senses, which wears out with the senses, and in which perishable things decay; and the memory of the soul, for which time does not exist and which lives over, at the same instant, every moment of its past existence. Fear not, ye who love. Time has power over hours, none over the soul. —*Lamartine.*

Woman loves or abhors; man admires or despises.

ADHESIVE COMPOSITION.—Glue and water with a small admixture of sweet oil, makes a good adhesive composition for labels. A little treacle, or sugar, mixed with gum, prevents the curling up and crispness of the latter.

HOW TO KEEP POOR.—Buy two glasses of ale every day, at five cents each, amounting in one year to $36 50; smoke three cigars, one after each meal, counting up in the course of the year to $54 75; keep a big dog, which will consume at least $15 worth of provisions, and a cat $5 more—altogether this amounts to the snug little sum of $110 26—sufficient to buy several barrels of flour, one hundred bushels of coal, one barrel of sugar, one sack of coffee, a good coat, a respectable dress, besides a frock for the baby, and half a dozen pair of shoes, more or less. Just think of it.

"'Tintion!" exclaimed an Irish sergeant to his platoon. "Front face, and tind to rowl call! As many of ye as is prisint will say 'Here!' and as many of ye as is not prisint will say 'Absent!'"

THE RICH AND THE POOR.—The rich have the most meat; the poor have the best appetite. The rich lie the softest, the poor sleep the soundest. The poor have health, the rich have delicacies. The rich hang themselves through fear of poverty, the poor (such as have always been poor) laugh and sing, and love their wives too well to put their necks into the noose.

Man may err and be forgiven; but poor woman, with all his temptation, and but half his strength, is placed beyond the hope of earthly salvation, if she but once be tempted into crime.

The ignorant love too much; the man of talent too little.

"I see," said a young lady, "that some booksellers advertise blank declarations for sale; I wish I could get one." "Why?" said the mother. 'Because, ma, Mr. H. is too modest to ask me to marry him; and perhaps if I could fill a blank declaration with the question he would sign it."

"Boy," said a fashionably dressed young man to the servant of one of his companions, "is your master at home?" "Yes, sir," replied the boy, "master is at home, but he's confined to his room.—He's a growing of moostashes, and ain't allowed to see anybody but his 'air dresser."

"I am going to the post-office, Bob—shall I inquire for you?" Well, yes, if you want to, but I don't think you'll find me there."

What our Fine Fruits have sprung from.—The peach, originally, was a poisonous almond. Its flesh parts were then used to poison arrows, and it was for this purpose introduced into Persia. The transplanting and cultivation, however, not only removed its poisonous qualities, but produced the delicious fruit we now enjoy.

The nectarine and apricot are natural hybridations between the peach and plum.

The cherry was originally a berry like fruit, and cultivation has given each berry a separate stem, and improved its quality. The common mazzard is the original of most of the present kind of cherries.

The cabbage originally came from Germany, and is nothing more than

common sea kale. Its cultivation has produced the present cabbage, and its different acclimations the different kinds; while its hybridations with other similar plants have produced the cauliflower.

The common wild pear is even inferior to the choke pear, and still, by cultivation, it has come to rank among our finest fruits.

This shows the benefits of cultivation in the vegetable world; but the change which cultivation has effected in the mind of man is infinitely greater.

Women can easily preserve their youth; for she who captivates the heart and understanding never grows old.

Boys, if you don't want to fall in love, keep away from muslin. You can no more play with girls without losing your hearts, than you can play with gamblers without losing your money. The heartstrings of a woman, like the tendrils of a vine, are always reaching out for something to cling to. The consequence is, that before you know you are going you are gone, like a lot at an auction.

"Mr. Tomkins," said a young lady, who had been showing off her wit at the expense of a dangler, "you remind me of a barometer, that is filled with nothing in the upper story." "Divine Julia," meekly replied her adorer, "in thanking you for that compliment, let me remind you that you occupy my upper story."

SECOND-HANDED SWEARING.—It is very common among a large number of professors of religion, in telling anecdotes, to use the oaths that the profane swearer employs to decorate the same; or, in repeating the conversation of others, to use the same oaths that they used. Such persons speak thoughtlessly, or they have not a proper knowledge of Christian propriety. It is offensive to every one who has correct views of Christian decorum. It must be offensive to ladies of refinement, to hear the broad, full-toned oath from the lips of any man, especially a professor, though only repeating what others have said. It must be contrary to the wishes of thoughtful Christian parents, for persons to repeat blasphemies in the presence of their children. It sounds very bad to hear the name of God profaned in this irreverent manner, and in frivolous conversation.

THE BEST SEWING MACHINE.—The London Punch of the 5th of March contains the following admirable description of an old fashioned sewing machine, which every bachelor should possess:—

The very best sewing machine that a man can have is a wife. It is one that requires but a kind word to set in motion, rarely gets out of repair, makes but little noise, will go uninterruptedly for hours without the slightest trimming or the smallest personal supervision being necessary. It will make shirts, darn stockings, sew on buttons, mark pocket handkerchiefs, cut out pinafores, and manufacture children's frocks out of any old thing you have a mind to give it; and this it will do behind your back just as well as before your face. In fact, you may leave the house for days, and it will go on working just the same. If it does get out of order a little from being

overworked, it mends itself by being left alone for a short time, after which it returns to its sewing with greater vigor than ever. Of course sewing machines vary a great deal. Some are much quicker than others. It depends in a vast measure upon the particular pattern you select. If you are fortunate in picking out the choicest pattern of a wife—one, for instance, that sings whilst working, and seems to be never so happy as when her husband's linen is in hand—the sewing machine may be pronounced perfect of its kind; so much so that there is no make-shift in the world that can possibly replace it, either for love or money. In short, no gentleman's establishment is complete without one of these sewing machines in the house.

The Congress of the United States consists of a Senate and House of Representatives, and must assemble at least once every year, on the first Monday in December, and also at the call of the President by proclamation.

The Senate is composed of two members from each State, which are chosen by the Legislatures of the several States, for the term of six years, one-third of them being elected biennially.

The Vice-President of the United States is the President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. In his absence, a President *pro tempore* is chosen by the Senate.

The House of Representatives is composed of members from the several States, elected by the people for two years. The Representatives are apportioned among the different States according to population.

The present ratio, according to the new apportionment, is one member for every 70,680 souls in each State, making the whole number of members 233.

The compensation of each member of the Senate and House of Representatives is $3,000 per session, or $6,000 for each Congress, and $8 for every twenty miles travel in the usual road, in going to and returning from the seat of Government.

The number of Electors of President and Vice-President, under the new apportionment, will be 296, of whom 149 is necessary for a choice.

The Government of the United States is represented by Ministers Plenipotentiary at the Courts of Great Britain, France, Russia, Prussia, Austria, Spain, Brazil, and Mexico; and by Charges d'Affaires at the courts of most of the other foreign countries with which this country is much connected by commercial intercourse.

The pay of Ministers Plenipotentiary is $9,000 per annum, as a salary, besides $9,000 for outfit. The pay of Charges d'Affaires is $4,500 per annum; of Secretaries of Legation, $2,000; of Ministers Resident, $5,000.

'LASSES CANDY.

Dr. Cummings, of the Brattleboro' Phœnix, who knows many things, and all of them thoroughly, thus treats his readers to a recipe for making molasses candy, which is one of our "peculiar institutions:"—"Take two cups of molasses, one of sugar, one tablespoonful of vinegar, and a piece of butter the size of a walnut. Boil briskly and constantly twenty minutes, stirring all the time; when cool enough to pull, do it quickly, and it will come white rapidly. Use the above proportions and follow directions, and you will have good candy."

HOW DEEP TO PLANT SEEDS.

The question of how deep to plant wheat has been several times demonstrated in France by experiments, from laying seed on the surface to as great a depth as several inches below at intervals of half an inch, and the result in each proved—premising, always, the extreme care in choosing the seed, depth of tillage, manure, &c. &c.—wheat was always found to yield the largest and best crop when planted about one inch and a half deep. Barley and oats, from two inches to two and one-half. Beets, peas, beans, corn, and colza, one inch and a half. Flax and ruta baga turnip, a half inch deep. Turnips and carrots, a half inch deep. The seeds for meadows need hardly covering.—*Journ. Am. Institute.*

ASHES FOR POTATOES.

Rufus Brown, of Chelsea, Orange County, Vt., says, that in an experiment tried by him the gain in the crop of potatoes by the use of ashes at the rate of a teacupful to the hill, was about a bushel and a half of potatoes for each bushel of ashes used. The kind of potatoes was the "English pink-eye," and yield 200 bushels per acre. The ground was planted May 7, with the ashes in holes, and a little dirt over them. It was ploughed and hoed June 18, the rows being four feet apart and hills three feet. The ashes cost 12½d a bushel, and potatoes sold at 36 cents, returning full 50 cents a bushel for the ashes employed.

LICE ON CALVES.

I have discovered a method of ridding calves of lice. Give them flax-seed. I am wintering eight calves; they became very lousy, and I fed them half a pint at a time for two days, and the oil from it drove the lice all off.—*Genesee Farmer.*

TO CLEAN PEWTER AND TIN.

Dish-covers and pewter requisites should be wiped dry immediately after being used, and kept free from steam or damp, which would prevent much of the trouble in cleaning them. Where the polish is gone off, let the article be first rubbed on the outside with a little sweet oil laid on a piece of soft linen cloth; then clean it off with pure whiting on linen cloths, which will restore the polish.

[From the Biblical Recorder.]

MAD STONE.

There is a Mad Stone at Mr. Joseph Pointer's, in Person County, N. C., eight or nine miles east of Milton, and twelve or thirteen miles south by west of Roxborough. Dr. Pointer, formerly of Caswell, carried one piece to the West, but left the other in Person County. It will cure the bite of a mad dog or a spider. Persons afflicted should go to him, as I do not know that he would send the rock from home.

E. DODSON.

THE HARVEST KING,

A NEW AND IMPROVED

REAPER AND MOWER.

The Harvest King has passed triumphantly through the Harvest of 1858 and 1859, and is the most popular machine in all sections where it has been introduced. Its advantages are simplicity of construction combined with great durability; it is light in weight and requires but two horses to work it in the heaviest grain or grass; it has but one cogwheel and pinion. The knives have a stroke of six inches, and receive their motion from an adjustable geared cam, and is totally different from all other cam machines; it cuts a swath of five and a half feet, and took the first premium before the Maryland Institute.

Farmers may rest assured that it is the best Reaper in use, and it will be sold to them at about one-third less price than they have heretofore paid for machines much inferior to it.

Descriptive circulars will be mailed to all who desire them.

GUNN'S DOMESTIC MEDICINE.

This book points out, in plain language, free from doctors' terms, the Diseases of Men, Women, and Children, and the latest and most improved means used in their cure, and is intended expressly for the benefit of families. It also contains descriptions of the MEDICAL ROOTS AND HERBS OF THE UNITED STATES, and how they are to be used in the cure of diseases. It is arranged on a new and simple plan, by which the practice of Medicine is reduced to principles of common sense.

This invaluable book has passed through many editions; it has now been revised and improved in every respect, and enlarged to nearly double its former size; and contains nine hundred octavo pages.

It does not propose to dispense with physicians in severe cases; but it does propose to save thousands and tens of thousands annually, by putting the means of cure into every man's hands, and of saving many valuable lives (which is of far more importance), by instructing individuals how to check disease in its beginnings, before it has acquired too much strength to resist and overcome.

BEACH'S AMERICAN PRACTICE,

OR

FAMILY PHYSICIAN;

Being the Scientific System of Medicine on Vegetable Principles.

Designed for the use of Families and Physicians.

COMPLETE IN ONE VOLUME,

Illustrated with nearly two hundred engravings.

BY W. BEACH, M. D.

This incomparable book, which has passed through seventeen editions of thirty thousand each, embraces the character, causes, symptoms, and treatment of the diseases of men, women, and children of all climates, and comprehends the entire range of Hygiene, Medicine, Surgery, Midwifery, Materia Medica, and Pharmacy, which are illustrated with nearly two hundred engravings, nearly one hundred of which are colored engravings of plants.

These doctrines have guided my practice many years, and experience has taught me not to distrust their truth, safety, and value.

Every one may be his own doctor at a cheap rate, and enjoy a sound mind in a sound body. The remedies grow around your own doors.

A FARMER'S SONG.

We envy not the princely man,
In city or in town,
Who wonders whether pumpkin-vines
Run up the hill or down.
We care not for his marble halls,
Nor yet his heaps of gold;
We would not own his sordid heart
For all his wealth thrice told.

We are the favored ones of earth—
We breathe pure air each morn;
We sow, we reap the golden grain,
We gather in the corn.
We toil—we live on what we earn;
And more than this we do—
We hear of starving millions round,
And gladly feed them, too.

The lawyer lives on princely fees,
Yet drags a weary life;
He never knows a peaceful hour—
His atmosphere is strife.
The merchant thumbs his yardstick o'er—
Grows haggard at his toil;
He 's not the man God meant him for—
Why don't he till the soil?

The doctor plods through storm and cold,
Plods at his patient's will;
When dead and gone, he plods again,
To get his lengthy bill.
The printer—bless his noble soul!—
He grasps the mighty earth,
And stamps it on our welcome sheet,
To cheer the farmer's hearth.

We sing the honor of the plough,
And honor of the press—
Two noble instruments of toil,
With each a power to bless—
The bone and nerve of this fast age,
True wealth of human kind.
One tills the ever generous earth,
The other tills the mind.

WINTER RULES.—Never go to bed with cold, damp feet.

On going into a cold air, keep the mouth resolutely closed, that, by compelling the air to pass circuitously through the nose and head, it may become warmed before it reaches the lungs, and thus prevent those shocks and sudden chills which frequently end in pleurisy, in pneumonia, and in other serious forms of disease.

Never sleep with the head in the draft of an open door or window.

Let more cover be on the lower limbs than on the body. Have an extra covering within easy reach in case of a sudden and great change of weather during the night.

Never put on a new boot or shoe in beginning a journey.

Never stand still a moment out doors, especially at street corners, after having walked even a short distance.

Never ride near the open window of a vehicle for a single minute, especially if it has been preceded by a walk. Valuable lives have thus been cut short, or good health permanently destroyed.

Never wear India-rubbers in cold, dry weather.

If compelled to face a bitter cold wind, draw a silk handkerchief over the face; it will modify the cold wonderfully.

Those who are easily chilled on going out of doors should have some cotton batting attached to the vest or other garment, so as to protect the space between the shoulder-blades behind, the lungs being attached to the body at that point. A little there is worth five times the amount over the chest in front.

Never sit for more than a minute at a time with the back near the fire.

Avoid sitting against cushions in the backs of pews in churches. If the uncovered board feels cold, sit erect without touching it.

Never begin a journey until breakfast has been eaten.

After singing or speaking in a warm room in winter, do not leave it for at least ten minutes, and even then close the mouth, put on the gloves, wrap up the neck, and put on a cloak or overcoat before passing out of the door. The neglect of these has laid many a good and useful man in a premature grave.

Never speak under a hoarseness, especially if it requires an effort, or gives a hurting or painful feeling, for it often results in a permanent loss of voice, or long life of invalidism.—*Hall's Journal of Health.*

DIARRHŒA is a very common disease in summer time. Cholera is nothing more than exaggerated diarrhœa. When a man has died of diarrhœa, he has died of cholera in reality. It may be well for travellers to know that the first, the most important, and the most indispensable item in the arrest and cure of looseness of the bowels is absolute quietude on a bed. Nature herself always prompts this, by disinclining us to locomotion. The next thing is, to eat nothing but common rice, parched like coffee, and then boiled, and taken with a little salt and butter. Drink little or no fluid of any kind. Bits of ice may be eaten and swallowed at will. Every step taken in diarrhœa, every spoonful of liquid, only aggravates the disease. If locomotion is compulsory, the misfortune of the necessity

may be lessened by having a stout piece of woollen flannel bound tightly round the abdomen, so as to be doubled in front, and kept in its place. In the practice of many years, we have never failed to notice a gratifying result to follow these observances.—*Hall's Journal.*

MUTTON CUSTARD FOR BOWEL COMPLAINTS OR CONSUMPTIVE CASES.—Take two ounces of fresh mutton suet shred fine, and half a drachm of cinnamon, or some grated nutmeg, and boil in rather more than a pint of milk; when boiled, to be set by the fire till the scum rises, which should then be carefully taken off. Half a teacupful may be given, warm or cold, as the patient prefers, three or four times a day. It should be continued till the complaint is quite cured.

BUNIONS may be checked in their early development by binding the joint with adhesive plaster and keeping it on as long as any uneasiness is felt. The bandaging should be perfect, and it might be as well to extend it round the foot. An inflamed bunion should be poulticed, and a larger shoe be worn. Iodine twelve grains, lard or spermaceti ointment half an ounce, makes a capital ointment for bunions. It should be rubbed on gently twice or thrice a day. Enlarged joints should be rubbed thrice a day with common salad oil, care being taken at the same time not to strain or overtax the feet by too great or too frequent exercise. Slippers, and *loose* ones, should invariably be worn. Of shoes we may say the same thing; on no account have tight-fitting shoes, slippers, or boots.

TO TAKE INK-BLOTS FROM PAPER.—A solution of oxalic acid, citric acid, or tartaric acid may be applied upon the paper without fear of damage. These acids take out writing-inks, but do not interfere with the printing. A chlorine water applied to blots will remove them.

A CERTAIN CURE AND PREVENTIVE FOR CHAPPED HANDS AND FACES.—By putting three to six drops of glycerine into the water before washing the hands and face, or, if only washing the hands, drop *one* drop into the palm of the hand after washing off the soap and dirt, rub all over the hands and wrists, and then dry thoroughly. It protects the skin from the strongest frosts.

A WASH FOR CLEANSING AND PREVENTING THE HAIR FROM FALLING OFF.—Take two large handfuls of rosemary leaves, a small knob of common soda, and a drachm of camphor. Put it in a jug, pour on it a quart of boiling water, and cover it closely to keep the steam in; let it stand for twelve hours, then strain it, and add a wineglassful of rum. This will keep good for several months in bottles well corked, and a piece of camphor in each. If the hair falls off much, the wash ought to be applied to the roots, with a piece of sponge, every other day. It is also best to discontinue the use of any pomade; plenty of brushing and the wash giving a brighter and cleaner gloss to the hair than the best macassar. There is not any objection, however, to use a little cosmetic along the partings, as the short hairs are apt to stand up and look untidy.

TO BORE A HOLE THROUGH THE BOTTOM OF A GLASS BOTTLE.—A drill supplied with emery and water is better than a diamond for making small holes in glass. As emery does not improve the edge of a drill, a piece of iron wire may be substituted. A diamond will cut out circles, making large holes, but is quite unsuited for *boring*. Common glass may be drilled with an ordinary bow drill, by keeping one or two drops of spirits of turpentine on the glass at the point of the drill. Of course, care must be taken not to apply too much pressure, or you will break the glass.

STIFFNESS TO COLLARS.—A little gum Arabic and common soda added to the starch gives extreme stiffness and gloss to collars.

TO CLEAN PEWTER AND TIN.—Dish-covers and pewter requisites should be wiped dry immediately after being used, and kept free from steam or damp, which would prevent much of the trouble in cleaning them. Where the polish is gone off, let the article be first rubbed on the outside with a little sweet oil laid on a piece of soft linen cloth; then clean it off with pure whiting on linen cloths, which will restore the polish.

VARNISHING PAPER-HANGING.—Almost any sort of light-bodied varnish may be used for walls, but what is called "pale carriage varnish" is perhaps the best. When the walls are dry and clean, first apply a coating of glue size, laid on nearly cold with a soft brush, taking care not to disturb the color.

PIMPLES ON THE FACE.—Sponge the parts with very hot water for a quarter of an hour every morning; then take a rough but soft towel, and press deeply while rubbing the surface, so as to press out the hardened contents of the follicles, which cause the pimples. By perseverance in this plan, although those pimples already existing will be made worse from the irritation of the rubbing, yet fresh ones will cease to appear; and in time the eruption will be nearly or quite cured. It always ceases after thirty or thirty-five years of age.

CREAM SPONGE-CAKE (*excellent*).—One cup of sugar, one cup of flour, one-half cup of cream, and two eggs.

The Congress of the United States consists of a Senate and House of Representatives, and must assemble at least once every year, on the first Monday in December, and also at the call of the President by proclamation.

The Senate is composed of two members from each State, which are chosen by the Legislatures of the several States, for the term of six years, one-third of them being elected biennially.

The Vice-President of the United States is the President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. In his absence, a President *pro tempore* is chosen by the Senate.

The House of Representatives is composed of members from the several States, elected by the people for two years. The Representatives are apportioned among the different States according to population.

The present ratio, according to the new apportionment, is one member for every 70,680 souls in each State, making the whole number of members 233.

The compensation of each member of the Senate and House of Representatives is $3,000 per session, or $6,000 for each Congress, and $8 for every twenty miles travel in the usual road, in going to and returning from the seat of Government.

The number of Electors of President and Vice-President, under the new apportionment, will be 296, of whom 149 is necessary for a choice.

The Government of the United States is represented by Ministers Plenipotentiary at the Courts of Great Britain, France, Russia, Prussia, Austria, Spain, Brazil, and Mexico; and by Charges d'Affaires at the courts of most of the other foreign countries with which this country is much connected by commercial intercourse.

The pay of Ministers Plenipotentiary is $9,000 per annum, as a salary, besides $9,000 for outfit. The pay of Charges d'Affaires is $4,500 per annum; of Secretaries of Legation, $2,000; of Ministers Resident, $5,000.

THE HARVEST KING,

A NEW AND IMPROVED

REAPER AND MOWER.

The Harvest King has passed triumphantly through the Harvests of 1858 and 1859, and is the most popular machine in all sections where it has been introduced. Its advantages are simplicity of construction combined with great durability; it is light in weight and requires but two horses to work it in the heaviest grain or grass; it has but one cogwheel and pinion. The knives have a stroke of six inches, and receive their motion from an adjustable geared cam, and is totally different from all other cam machines; it cuts a swath of five and a half feet, and took the first premium before the Maryland Institute.

Farmers may rest assured that it is the best Reaper in use, and it will be sold to them at about one-third less price than they have heretofore paid for machines much inferior to it.

Descriptive circulars will be mailed to all who desire them.

THE BATTLE OF MANASSAS.

By Mrs. Clarke, wife of Col. Clarke, 14th Regt. N. C.

DEDICATED TO GEN. BEAUREGARD, C. S. A.

"Now glory to the Lord of Hosts!" oh, bless and praise His name,
That He hath battled in our cause, and brought our foes to shame;
And honor to our Beauregard, who conquered in His might,
And for our children's children won, Manassas' bloody fight.
Oh let our thankful prayers ascend, our joyous praise resound,
For God—the God of victory, our untried flag hath crowned!

They brought a mighty army, to crush us with a blow,
And in their pride they laughed to scorn the men they did not know;
Fair women came to triumph, with the heroes of the day,
When the "boasting Southern rebels" should be scattered in dismay.
And for their conquering Generals, a lordly feast they spread,
But the wine in which we pledged them, was all of ruby red!

The feast was like Belshazzar's—in terror and dismay,
Before our conquering heroes, their Generals ran away.
God hath weighed them in the balance; and His hand upon the wall,
At the taking of Fort Sumter, had fore-doomed them to their fall.
But they would not heed the warning, and scoffed in unbelief,
Till their scorn was changed to wailing, and their laughter into grief!

All day the fight was raging, and, amid the cannon's peal
Rang the cracking of our rifles, and the clashing of our steel;
But above the din of battle, our shout of triumph rose,
As we charged upon their batteries, and turned them on our foes.
We staid not for our fallen; and we thought not of our dead,
Until the day was ours, and the routed foe had fled.

But once our spirits faltered—Bee and Bartow both were down,
And our gallant Col. Hampton lay wounded on the ground;
But Beauregard, God bless him! led the legion in his stead,
And Johnston seized the colors, and waved them o'er his head!
E'en a coward must have followed, when such heroes led the way;
And no dastard blood was flowing in Southern veins that day!

But every arm was strengthened, and every heart was stirred,
When shouts of "Davis! Davis!" along our lines were heard;
As he rode into the battle the joyful news flew fast—
And the dying raised their voices, and cheered him as he passed.
Oh! with such glorious leaders, in Cabinet and field,
The gallant Southern chivalry will die but never yield!

But from the wings of victory, the shafts of death were shed,
And our pride is dashed with sorrow when we count our noble dead;
Though in our hearts they're living—and to our sons we'll tell
How gloriously our Fisher and our gallant Johnson fell;
And the name of each we'll cherish as an honor to his State,
And teach our boys to envy, and, if need be, meet their fate.

"Then glory to the Lord of Hosts!" oh bless and praise his name,
For He hath battled in our cause, and brought our foes to shame.
And honor to our Beauregard, who conquered in His might,
And for our children's children, won Manassas' bloody fight.
Oh! let our grateful prayers ascend, our joyous praise resound,
For God, the God of victory, our untried flag hath crowned!

JANUARY.—Prepare hot bed, and sow tomatoes, cucumbers, Early York, Sugar-Loaf and Flat Dutch cabbage, for an early crop. As little can be done in the garden, prepare dung, carry it to your beds, and spread it in fine weather; get pea sticks, and if the weather is open, sow early peas, plant potatoes, &c., covering slightly to preserve from frost.

A party of belated gentlemen, about a certain hour, began to think of home and their wives' displeasure, and urged a departure. "Never mind," said one of the guests, "fifteen minutes will make no difference; my wife is as mad now as she can be."

FEBRUARY.—Sow asparagus seed, Sugar Loaf and Early York cabbage, beets and radishes twice. Parsnips, carrots, garden beans, lettuce, peas. Latter end transplant cauliflowers, dress asparagus beds, plant potatoes and strawberries; but a better season for strawberries is September or October. Plant out turnips, rutabaga, beets, parnips, carrots, &c., for seed. Spade deep and make fine.

VARNISHING PAPER-HANGING.—Almost any sort of light-bodied varnish may be used for walls, but what is called "pale carriage varnish" is perhaps the best. When the walls are dry and clean, first apply a coating of glue size, laid on nearly cold with a soft brush, taking care not to disturb the color.

APRIL.—If artichokes were not slipped last month, do it now. Sow bushel and garden beans, peas, cabbages, celery, cresses, beets, nasturtiums, lettuce, radishes twice, turnips for an early crop, but 10th of August for a winter crop; salsify, capsicums or red peppers, bene, broccoli, (the purple cape is the earliest,) melons, squashes or cimblins, cauliflower the 12th. Plant potatoes, Jerusalem artichokes; keep your strawberry beds clean of weeds; hoe and stick peas when five or six inches high, top beans when they come to their full height. Keep all clear of weeds.

MAY.—Continue to sow cauliflowers and broccoli, cucumbers, melons, peas, radishes twice, snap beans, &c., thin onions, carrots, &c.; diligent in clearing off weeds. Turf this month, if not done last.

TO TAKE INK-BLOTS FROM PAPER.—A solution of oxalic acid, citric acid, or tartaric acid may be applied upon the paper without fear of damage. These acids take out writing-inks, but do not interfere with the printing. A chlorine water applied to blots will remove them.

JUNE.—Sow cabbages for a fall crop. Prick out cauliflowers and broccoli, sow radishes, transplant cabbage, red pepper, &c. Sow a few turnips for an early fall crop, to answer for soups. Gather herbs (which should be done when coming into flower) and laid in the shade to dry gradually, and then keep in a dry place for use.

NOVEMBER.—Take up your cabbage or lay them down where they stand, with their heads to the North, and cover them with earth, just leaving the crown uncovered, they will keep well and grow all the winter. Continue to hill up celery, prune and plant out young trees, or anything of the tree or shrub kind that has root to it; take up turnips, beets, carrots, &c., and put them away in sand for winter use.

Take counsel of one greater and one less than yourself, and afterwards form your own opinion.

J. H. Reagan, of Texas, Postmaster General.
Attorney General.

The Congress of the Confederate States consists of a Senate and House of Representatives, and must assemble at least once every year, and also at the call of the President by proclamation.

The Senate is composed of two members from each State, which are chosen by the Legislatures of the several States, for the term of six years, one-third of them being elected biennially.

The Vice President of the Confederate States is President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. In his absence, a President *pro tempore* is chosen by the Senate.

The House of Representatives is composed of members from the several States, elected by the people for two years. The Representatives are apportioned among the different States according to population.

The present ratio, according to the new apportionment, is one member for every 50,000 souls in each State, making the whole number of members ——

ALL QUIET ALONG THE POTOMAC TO-NIGHT.

[The following poetical gem we copy from a Western paper. The original was found in the pocket of a volunteer who died in camp on the Potomac:]

"All quiet along the Potomac," they say,
"Except now and then a stray picket
Is shot, as he walks on his beat to and fro,
By a rifleman hid in the thicket."
'Tis nothing—a private or two, now and then,
Will not count in the news of the battle;
Not an officer lost—only one of the men—
Moaning out, all alone, the death rattle.
All quiet along the Potomac to-night,
Where the soldiers lie peacefully dreaming;
Their tents in the rays of the clear autumn moon,
Or the light of the watchfires, are gleaming.
A tremulous sigh as the gentle night wind
Through the forest leaves slowly is creeping;
While the stars up above, with their glittering eyes,
Keep guard—for the army is sleeping.
There's only the sound of the lone sentry's tread,
As he tramps from the rock to the fountain,
And thinks of the two on the low trundle bed,
Far away in the cot on the mountain;
His musket falls slack—his face dark and grim,
Grows gentle with memories tender,
As he mutters a prayer for the children asleep—
For their mother, may Heaven defend her.
The moon seems to shine as brightly as then,
That night when the love yet unspoken
Leaped up to his lips, and when low murmured vows,
Were pledged, to be ever unbroken;
Then drawing his sleeve roughly over his eyes,
He dashes off tears that are welling,
And gathers his gun close up to its place,
As if to keep down the heart swelling.
He passes the fountain, the blasted pine tree,
The footstep is lagging and weary,
Yet onward he goes through the broad belt of light,
Toward the shades of a forest so dreary.
Hark! Was it the night wind that rustled the leaves?
Was it the moonlight so wondrously flashing?
It looked like a rifle—"Ha!—Mary, good bye!"
And the life blood is ebbing and plashing.
All quiet along the Potomac to-night,
No sound save the rush of the river;
While soft falls the dew on the face of the dead—
The picket's off duty, forever.

JUNE.—By this time some of the early crops will be cleared off, and such ground as was manured for the early crops will be excellent for late Beets and Carrots. Plant Kidney Beans; transplant Cabbage, Celery, Cucumber in hills; sow Beets and Carrots; transplant Leeks; plant Peas, Pumpkin seed, Summer Raddish, Squash. As the Herbs come into flower, they should be cut on a dry day and spread in a shady place to dry for winter use.

JULY.—This is an important month for transplanting Cabbage, Celery, Endive, Leeks, Pepper plants, &c., for full autumn crops. Prepare trenches for Celery plants beforehand, in order that they may be ready to catch the rain. Plant Beans; Cabbage seed may be sown for Collards, Cucumber seed for pickles; sow Endive and transplant former sowings; sow Summer Radish in drills; sow Turnip rooted Cabbage seed in varieties, Ruta Baga and common Turnip seed. Whatever herbs may be required for winter use should be cut off and dried as they come into flower. Burnet, Chervil, Fennel, Mint, Parsley, Sweet Marjoram, Tarragon, Thyme, Winter and Summer Savory, may all be cut this month.

OCTOBER.—Weed out Spinach, &c.; earth up Celery; do it in dry weather, and not even then while the dew is on it. Begin to dig and secure all kinds of Vegetables soon enough to get the whole placed away before the end of the next month; take up Potatoes and other roots; secure them from wet and frost; collect Pumpkins and Winter Squashes, and expose them to the wind and air on a dry bench before they are stowed away; tie up full grown plants of Endive, every week in dry weather, for blanching in succession.—Jerusalem Artichokes may be dug up to preserve for winter consumption.

NOVEMBER.—Endeavor to avoid having your garden products frozen fast in the ground; begin in good earnest to secure them. Cabbage may be taken up and laid in, rows against a ridge, so as to form a square, compact, close-growing bed, the roots and stems being buried up to the lower leaves in Cabbages. The beds may afterwards be covered with straw, or a temporary shed erected over them.

A West Indian, who had a remarkably fiery nose, sleeping in his chair, a negro boy who was in waiting, observed a musquito hovering about his face. Squash eyed the insect very attentively, and at last saw him alight on his master's nose, and immediately fly off again. "Ah!" exclaimed the negro, "me glad to see you *burn your foot!*"

DECEMBER.—If all has not been done as heretofore directed, there is no time to be lost. Every thing that needs protection should now be attended to, and if the weather continues open, some of the ground may be ploughed or trenched, to receive the benefit of the winter frosts. Provide manure for another year; dress your Artichoke beds and cover them; defend Mushroom beds with dry straw or long stable litter.

ALL RIGHT.—"Boy," said a visitor at the house of a friend to his little son, "step over and see how *old Mrs. Brown is.*" The boy did the errand, and on his return reported that Mrs. Brown did not know how old she was.

The Congress of the Confederate States consists of a Senate and House of Representatives, and must assemble at least once every year, and also at the call of the President by proclamation.

The Senate is composed of two members from each State, which are chosen by the Legislatures of the several States, for the term of six years, one-third of them being elected biennially.

The Vice President of the Confederate States is President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. In his absence, a President *pro tempore* is chosen by the Senate.

The House of Representatives is composed of members from the several States, elected by the people for two years. The Representatives are apportioned among the different States according to population.

The present ratio, according to the new apportionment, is one member for every 50,000 souls in each State, making the whole number of members 107.

For Saving Bacon.—Make a solution of salt in hot water, (heat raised as high as fire can make it,) put the pork in the hot brine with as much animal heat as possible. Let the hams and shoulders be kept in three minutes and a half, and then hang them up immediately and smoke them, and you have a choice article of bacon in a very short time to what you will by the usual process, as well as saving four-fifths of your salt.

MAXIMS TO GUIDE A YOUNG MAN.

Keep good company or none.

Never be idle. If your hands cannot be usefully employed, attend to the cultivation of your mind.

Always speak the truth.

Make few promises.

Live up to all your engagements.

Have no very intimate friends.

Keep your own secrets, if you have any.

When you speak to a person, look him in the face.

Good company and good conversation are the very sinews of virtue.

Good character is above all things else.

Never listen to any loose or infidel conversation.

Your character cannot be essentially injured except by your own acts.

If any one speaks evil of you, let your life be such that none will believe him.

Drink no kind of intoxicating liquors.

Ever live, misfortune excepted, within your income.

When you retire to bed, think over what you have been doing during the day.

Never speak lightly of religion.

Make no haste to rich, if you would prosper.

Small and steady gains give competency with tranquility of mind.

Never play at any game of chance.

Avoid temptation, through fear that you may not withstand it.

Earn mony before you spend it.

Never run in debt, unless you see a way to get out again.

Never borrow, if you can possibly avoid it.

Do not marry until you are able to support a wife.

Never speak evil of any one.

Be just before you are generous.

Keep yourself innocent, if you would be happy.

Save when you are young to spend when you are old.

Never think that which you do for religion is time or money misspent.

Always go to church when you can.

Often think of death and your accountability to God.

Read over the above maxims at least once a week—Saturday night.

MUSIC HEALTHFUL.—Music, like painting and statuary, refines, and elevates, and ennobles. Song is the language of gladness, and it is the utterance of devotion. But coming lower down, it is physically beneficial; it rouses the circulation, wakes up the bodily energies, and diffuses life and animation around. Does a lazy man ever sing? Does a milk-and-water character ever strike a stirring note? Never. Song is the outlet of mental and physical activity, and increases both by its exercise. No child has completed a religious education who has not been taught to sing the songs of Zion. No part of our religious worship is sweeter than this. In David's day it was a practice and a study.—*Hall's Journal of Health.*

A BRILLIANT WHITEWASH.

Take half a bushel of nice, unslacked lime, slack it with boiling water, covering it during the process to keep in the steam. Strain the liquor through a fine sieve or strainer, and add to it a peck of clean salt, previously dissolved in warm water three pounds of ground rice, ground to thin paste and stirred and boiled hot; half a pound of powdered Spanish whiting, and a pound of clean glue, which has been previously dissolved by first soaking it well, and then hang it over a slow fire in a small kettel within a large one, filled with water. Add five gallons of hot water to the whole mixture; stir it well and let it stand a few days covered from the dirt. It should be put on quite hot; for this purpose, it can be kept in a kettle on a portable furnace. It is said that about one pint of this mixture will cover a square yard upon the out side of a house if properly applied. Brushes more or less may be used according to the neatness of the job required. It retains its brilliancy for many years. There is nothing of the kind that will compare with it either for inside or outside walls.—*Exchange paper.*

VALUABLE RECEIPT.—The worst case of cholera morbus, dysentery, and flux, that ever I saw I have repeatedly cured in a few minutes, by a strong tea made of the bark of the Sweet Gum, taken green from the tree is best—steep a handful to a pint of water until the liquor is like good coffee. Drink it clear or sweeten it with loaf sugar, or add a wine glass of good brandy if the shock is severe. If not infallible, it is remarkable in its effects, and well worth being known and tried in every family.

EXPELLING RATS.—Rats may be expelled from your cellars and graneries simply by scattering a few stalks and leaves of *mullen* in their paths. There is something very annoying in this plant to the rat. It affords, therefore, a very easy remedy for a most perplexing evil, and much more economical than gunpowder, "rat exterminator," cats or traps. The mullen is a very common production, and may be found in almost every field, as well as in pastures, and by the sides of highways.

CLEANING SILK.—The following is said to be an excellent receipt for cleaning silks: Pare three Irish potatoes into thin slices and wash them well. Pour on them half a pint of boiling water, and let it stand till cold; strain the water and add to it an equal quantity of alcohol. Sponge the silk on the right side, then half dry, and iron it on the wrong side. The most delicate colored silk may be cleaned by this process, which is equally applicable to cloth, velvet or crape.

GEESE, CATS AND BACHELORS.—The following paragraph is taken from the regular report of the proceedings of the Legislature in Connecticut:

Bill to tax geese, cats and bachelors, taken up. Mr. Harrison was opposed to the provision taxing batchelors. There was a tax laid already upon a goose, and any man who had been living twenty-five years without being married could be taxed under that section. The bill was postponed.

THE OLD NORTH STATE.

Carolina, Carolina, the home of our childhood,
The glory, the hope, of our age and our manhood,
Is invaded, invaded—is wounded and made red,
With the blood of her heroes, aye, the blood of her own dead.

CHORUS.

Oh! save! oh! save! the "Old North State forever."
Oh! fight! oh! fight! for the "good old North State."

Oh! ye sons of Carolina, give ear to the story;
Awake to your duty and fight for your glory;
Oh! sleep not, delay not, but rise in your power,
And let not the vandals advance from this hour.

Chorus—Oh! save! &c.

Gird your strength on, ye fathers, as a beast roused from his lair,
Come with faith and with prayer—let your hearts never despair;
Send, mothers, your sons, and your brothers, ye sisters,
With the prayers of the faithful, oh! God will assist us.

Chorus—Oh! save! &c.

From hill-top and plain, from mountain and valley,
Round the flag of your country, oh! hasten to rally;
Oh! ye men of Carolina, be noble and be brave,
To the foes of your country give only a cold grave.

Chorus—Oh! save! &c.

Ye seas and rivers, with all your powers oppose,
And the gates of your empire, ye mighty forests close;
Every temple of nature to our braves give a cover,
Every way of approach to our foes death discover.

Chorus—Oh! save! &c.

Oh! God of our country, in prayer and devotion,
We beg for our dear land as our heritage and portion;
Crush the strength of our foe on the land and on the sea,
Peace, plenty, and freedom may we evermore see.

Chorus—Oh! save! &c.

NOVEMBER.—Endeavor to avoid having your garden products frozen fast in the ground; begin in good earnest to secure them. Cabbage may be taken up and laid in rows against a ridge, so as to form a square compact, close growing bed, the roots and stems being buried up to the lower leaves in Cabbages. The beds may afterwards be covered with straw, or a temporary shed erected over them.

DECEMBER.—If all has not been done as heretofore directed, there is no time to be lost. Every thing that needs protection should now be attended to, and if the weather continues open, some of the ground may be ploughed or trenched, to receive the benefit of the winter frosts. Provide manure for another year; dress your Artichoke beds and cover them; defend Mushroom beds with dry straw or long stable litter.

LABOR-SAVING SOAP.

To each pound of common hard soap, add from one-half to three-quarters of an once of common borax, with one quart of water. Put the water in any convenient vessel upon the stove, add the borax, somewhat pulverized, and then put in the soap cut in thin pieces. Keep them hot, but not boiling, for two or three hours, or until the whole is well dissolved, and then set it aside to cool, when a solid mass will be formed. If the vessel is set upon the warm stove at night, the operation will be completed in the morning, though we think it better to stir the mass just before it is cooled. The night before washing, rub the clothes most soiled with the soap, and soak in water till morning. This soap, which has been more than doubled in quantity, will do quite as far, bulk for bulk, as the original, thus saving at least one-half. The boiling and washing are to be performed in the usual manner; but it will be found that the labor of rubbing is diminished three-fourths, while the usual caustic or eating effect of the soap is greatly lessened; and the hands will retain a peculiarly soft and silky feeling, even after a large washing. The preparation is adapted to all kinds of fabrics, colored or uncolored, including flannels, and is thought to increase their whiteness.

FINE HOME-MADE CANDLES.—For these the ingredients are in the following proportion: Take ten ounces of fresh mutton fat or suet, a quarter of a pound of bleached white wax, a quarter of an ounce of camphor, and two ounces of alum. Cut or break up all these articles, and then melt them together, skimming them well. Have ready the wicks, (which should be previously soaked in lime-water and saltpetre, and then thoroughly dried,) fix them in the mould, and pour in the melted liquid, proceeding as in the receipt for common mould candles. Candles made in this manner of the above materials are hard and durable, and will not run; burning also with a very clear light.

SUMMER DRINK.—Pour a quart of boiling water over half an ounce of loaf sugar and half an ounce of cream of tartar, with the outer rind of a lemon, either fresh or dried. When cold, strain for use.

CHEAP PUDDING.—Four ounces each of suet, currants, raisins and bread-crumbs, two table-spoonfuls of treacle and half a pint of milk. Mix them well together, and boil in a mould or basin two hours.

CITRIC ACID IN ACUTE RHEUMATISM.—Dr. Hartung state that this substance acts more efficaciously than lemon-juice i acute rheumatism. He forms a mixture with six drachms dis solved in five ounces of water, and sweetened with two ounce of syrup. This is to be taken in from fifteen to thirty-six hour the patient also drinking as much cold water as he pleases, an the parts being wrapped in wadding. Of forty-five cases acute rheumatism, some of them very bad ones, so treated, i two only was the result not satisfactory. Sometimes, even aft twenty-four hours of treatment, there is a notable diminution the pain and fever, although in most cases from two to thre days are required to produce this amendment. The remedy do not induce diarrhœa, and it favors transpiration.

YEAST.—Boil [illegible] clean-washed, middle-sized potatoes, an at the same time, boil in another vessel a handful of hops in quart of water; peel and mash the potatoes fine; pour part the hop water while hot upon the potatoes, and mix them wel then add with the remainder of the hop water, a spoonful sugar, beat all well; add a small portion of leaven to bring the fermentation, and set in a cool place. All the utensils mu be scalded every time they are used and washed perfectly clea One teacupful of the above potato yeast will answer for t quarts of flour.

THE

SOUTHERN HEPATIC PILLS!

THE BEST FAMILY MEDICINE!!

These pills are compounded by a Southern Minister of the Gospel whose disease led him to a discovery of the remedy. He was pronounced by several distinguished physicians to be in an advanced stage of the CONSUMPTION. These pills cured him, and for more than thirty years he has been an active pastor, and still is, although over seventy years of age.

Hundreds of Cases have been cured by them. The proprietor recommends them ONLY for *diseases of the Liver*. He has, however, many certificates testifying to the good effects in Liver Diseases, Pneumonia, Bronchitis, Dyspepsia, Bilious Fevers, Chills and Fevers, Dysentery, Diarrhœa, Rheumatism, Pleurisy, Piles, and Worms.

Gentlemen have testified that these pills have saved them $175 to $200.

☞ *No Plantation* should be without them.

☞ Read the statements of Messrs. Potter, Mr. Vaden and Col. Wright, on the wrappers of the pills. These certificates are not "put up" for the occasion. They are from such men as Stephen D. Wallace, Esq., President of the Wilmington and Weldon Railroad, Wm. Carraway, Esq., of Wayne co., Mr. Raney of Granville, Rev. Mr. Potter of Greene, Col. John Wright of Alabama, now of Chatham, Rev. C. F. Deems, D. D., Presiding Elder of the Newbern District, and from the following parties in Virginia: Messrs. Wm. Verrell of Chesterfield, Peter Vaden and M. R. Moseley of Dinwiddie, A. W. D. Traylor, M. Perkinson, Capt. W. P. Davis, Geo. W. Minnis, Photographer, and Robert M. Patterson of Petersburg, Va.

☞ Without puffing they have gained such hold upon public esteem that the proprietor has received orders for *more than* 3700 *boxes in one day*.

The Medicines of which the Pills are compounded are now so costly, and rise from time to time, that the proprietor must refer to the newspapers for current prices. They are for sale by all the principal Druggists in North Carolina. *To dealers and planters everywhere, who take a gross, nearly one hundred per cent. discount upon retail prices will be made.* My address is

JANUARY.—Look around you, and endeavor to ascertain the results of your industry during the past year, in order to make improved arrangements for the future. Survey your former practice, and that of your acquaintances, with a view to improve on every thing you have done or seen. Make memorandum of such things as may be obtained in moments of leisure, in preference to putting it off until it is wanted.

He is the best educated man, who is the most of a man, and is best able to accomplish the great ends of life.

FEBRUARY.—Important at this season to collect plenty of manure; prepare dung and other heated materials for hot beds, for which select a situation well protected by a close fence or wall. When all is prepared, begin to sow Cabbage, Egg-plant, Lettuce, Cucumber and Tomato seed; plant Kidney Beans, Potatoes, Peas; sow Raddish seed. In cold beds, well protected, plant Broad Beans, sow Cabbage seed.

TO MAKE GOOD COFFEE OUT OF RYE.—The Rye is to be well cleaned, and then boiled till soft; but care is to be taken that it does not burst. It is afterwards to be dried in Coffee, and when ground it is fit for use.

If compelled to face a bitter cold wind, draw a silk handkerchief over the face; it will modify the cold wonderfully.

JUNE.—By this time some of the early crops will be cleared off, and such ground as was manured for the early crops will be excellent for late Beets and Carrots. Plant Kidney Beans; transplant Cabbage, Celery, Cucumber in hills; sow Beets and Carrots; transplant Leeks; plant Peas, Pumpkin seed, Summer Radish, and Squash.

TO TAKE INK-BLOTS FROM PAPER.—A solution of oxalic acid, citric acid, or tartaric acid may be applied upon the paper without fear of damage. These acids take out writing-inks, but do not interfere with the printing.

JULY.—This is an important month for transplanting Cabbage, Celery, Endive, Leeks, Pepper plants, &c., for full autumn crops. Prepare trenches for Celery plants beforehand, in order that they may be ready to catch the rain. Plant Beans; Cabbage seed may be sown for Collards, Cucumber seed for pickles; sow Endive and transplant former sowings; sow Summer Raddish in drills; sow Turnip-rooted Cabbage seed in varieties, Ruta Baga and common Turnip seed.

STIFFNESS TO COLLARS.—A little gum Arabic and common soda added to the starch gives extreme stiffness and gloss to collars.

SEPTEMBER.—Endive may still be transplanted for winter use; attend to earthing of Celery; tie up Endive plants for blanching; sow Rape, Cauliflower seed, Cabbage, Corn Salad, Cress, &c.; sow Mustard, Lettuce, Onion, to stand the winter, Radish for Fall use, Shallots, Spinach every week or ten days. This is a good season to make Mushroon beds in sheltered situations.

He who betrays another's secrets because he has quarreled with him, was never worthy the sacred name of "friend;" a breach of kindness on one side will not justify a breach of trust on the other.

Never sit for more than a minute at a time with the back near the fire.

NOVEMBER.—Endeavor to avoid having your garden products frozen fast in the ground; begin in good earnest to secure them. Cabbage may be taken up and laid in rows against a ridge, so as to form a square compact, close growing bed, the roots and stems being buried up to the lower leaves in Cabbages. The beds may afterwards be covered with straw, or a temporary shed erected over them.

DECEMBER.—If all has not been done as heretofore directed, there is no time to be lost. Everything that needs protection should now be attended to, and if the weather continues open, some of the ground may be ploughed or trenched, to receive the benefit of the winter frosts. Provide manure for another year; dress your Artichoke beds and cover them; defend Mushroom beds with dry straw or long stable litter.

A FEW IMPORTANT FACTS

IN REGARD TO

SOUTHERN HEPATIC PILLS.

1. THEY ARE PREPARED FROM THE BEST QUALITY of Medicines by the discoverer, now an aged Minister of the Gospel, and are safe.

2. They have been known for years, and tested by thousands.

3. Five hundred persons are known to have been cured by them.

4. They are not recommended by the Proprietor for every thing, but only for diseases which arise from disordered Livers.

5. Directions and certificates accompany each box, and these certificates are from well known and most respectable individuals.

6. Correspondents recommend them as good for Liver Disease, Chills and Fevers, Pneumonia, Jaundice, Dyspepsia, Bilious Fevers, Bilious Rheumatism, Worms, Pleurisy, Bronchitis, &c.

7. Several gentlemen state that the use of these Pills has been to them an annual saving of from $100 to $200; they are the best plantation Medicine ever offered to the public.

8. Some physicians of the highest standing prescribe them to their patients, and hundreds of boxes have been sold to regular practitioners.

9. During the last quarter, 2,880 boxes have been sold to two Druggists, one in South Carolina, and one in North Carolina, and some time ago over 3,700 boxes were ordered by Druggists in one town in Virginia.

☞ Price, $5 a box. For $50, a dozen boxes will be sent to any address. A very liberal discount to Druggists and country merchants. Cash (new currency) to accompany orders.

ECLIPSES.

There will be four eclipses this year, two of the Sun and two of the Moon, as follows:

I. An Annular Eclipse of the Sun on the 6th of March, beginning at 2 o'clock and 1 minute, in the morning, invisible in America; visible in Greenland, Africa, and Central Asia.

II. A Partial Eclipse of the Moon on the 20th of March, visible in the United States.

Beginning at	2	hours,	00	minutes	in the	morning.
Middle,	3	"	33	"	"	"
End,	5	"	07	"	"	"

Magnitude 9⅓ digits.

III. A Total Eclipse of the Sun on the 29th of September, beginning at 5 o'clock and 37 minutes in the morning, invisible here; visible in South America, and at the Cape of Good Hope.

IV. A Partial Eclipse of the Moon on the 13th of September, visible in nearly all America.

Beginning at	5	hours,	41	minutes, P. M.
Middle,	7	"	11	"
End,	8	"	41	"

Magnitude 8⅓ digits.

TIDES.

The data for calculating the time of high tide at Beaufort and Smithville were obtained from the Report of the U. S. Coast Survey for 1857. Allowing for variations produced by the wind, the time given in the Almanac ought to be true within a few minutes. The greatest variation at Beaufort is 50 minutes, at Smithville 47 minutes. Only one tide daily is given, the next time of high water may easily be obtained by adding 12 hours and 24 minutes to the time of the one given.

PARSON GREEN is sometimes in the habit of drawing upon a barrel of sermons bequeathed him by his father, who was also a minister of the gospel. Upon one occasion he got hold of a sermon, by mistake, which the old gentleman had once preached to the State Prison convicts. It opened well and the congregation were becoming deeply interested, when all at once the parson surprised them with the information, that if it had not been for the clemency of the Governor, every one of them would have been hanged a long time ago!

DISINFECTANT.—The papers are every where urging the free use of Copperas as a disinfecting agent. It is a cheap article, costing only a few cents per pound, and can be found at the druggists and many of the larger grocery stores. A couple of pounds may be dissolved in ten quarts of hot water, and the solution poured into sinks, gutters, cess-pools, and all other filthy places, with good effect.

FRENCH ALMANAC—JANUARY.—He who is born in this month will be labor ious, and a lover of good wines, but very subjeet to infidelity; he may too often forget to pay his debts; but he will be complaisant, and withal a fine singer. The lady born in this month, will be a pretty prudent housewife, rather melancholy, but yet good tempered.

TRIFLES.—We often hear people say, never mind, it is a trifle—forgetting that it is to trifles we are indebted for our destinies. It was a trifle—the lighting a cigar—that caused Fulton to form the acquaintanee of Chancellor Livingston; from which acquaintanee resulted a friendship that enabled the former to prove the feasibility of steam navigation. It was a trifle that led to the Punjaub war; and yet the Punjaub war was one of the most expensive outbreaks that England ever was engaged in. It commenced by stealing a bucket. This led to a row, the row to a riot, and the riot to a war—the expenses of which amounted to over $300,000,000. Again we say never despise trifles. A kind word spoken to a broken hearted genius, may make you President—while an ugly word to a blackguard, may plunge you into litigation and ruin.

"I do not wish to say anything against the individual in question," said a polite gentleman, "but I would remark, in the language of the poet, that to him, 'truth is strange, stranger than fiction.'"

FEBRUARY.—The man born in this month will love money much, but the ladies more; he will be stingy at home, but prodigal abroad. The lady will be a humane and affectionate wife and a tender mother.

THE FIG.—This, like the grape, is one of the oldest fruits cultivated. It probably originated in the garden of Eden, and is the only fruit that has come down to us unimproved, from that prince and father of horticulturists, Adam himself. We find no account of an improvement in its culture, but figs six thousand years ago were probably the same as figs of to-day. The fig is easily propagated by cuttings, layers, or dividing the roots, and will grow in almost any soil; but the fruit is of superior flavor when grown on a rich, sandy loam. It is liable to be winter-killed in this section, and should therefore be planted in an open exposure, where it may get all of the cold to retard its early budding. It is rarely killed in the winter, until the sap has commenced rising. It is well to prune the bush so as to form a tree, as it is better able to bear the cold of winter. A barren fig may sometimes be made productive by pruning the roots. When a winter is very severe, a fig tree may be protected from the cold by applying a good coat of stable manure around the roots, covering the ground around the tree, about six inches deep. There are many varieties, and all have their advocates. The fig should have more extensive culture.

Wood ashes and common salt, wet with water, will stop the crack of a stove, and prevent the smoke from escaping.

Green should be the prevailing color of bedstead hangings and window drapery,

MARCH.—The man born in this month will be rather handsome; he will be honest and prudent, but he will die poor. The lady will be a jealous, passionate chatterbox, something given to fighting, and in old age, too fond of the bottle.

USEFUL TO HOUSEKEEPERS.—The plant commonly known as "water pepper" or "smart weed," which may be found in abundance along our ditches, roads, lanes and barnyards, is an effectual and certain destroyer of the bed bug. A strong decoction is made of the herb, and the place infested with the insect washed well with it. Elderberry leaves, laid upon the shelves of a cupboard, will also drive away roaches and ants, while the common house fly will not venture in smelling distance of them.

A FOUR-HORSE coach comes suddenly upon a flock of geese on a narrow road and drives straight through the middle of them. A goose was never yet fairly run over, nor a duck. They are under the very wheels and hoofs, and yet somehow they contrive to flap and waddle off. Habitually stupid, heavy, and indolent, they are, nevertheless, equal to any emergency. Why does the lonely wood pecker, when he descends from his tree and goes to drink, stop several times on his way—listen and look around—before he takes his draught? No one knows.

APRIL.—The man who has the misfortune to be born in this month, will be subject to maladies. He will travel to his advantage, for he will marry a rich heiress, who will ——, no doubt you all understand. The lady of this month will be tall and stout, with a little mouth, little feet, little wit, but a great talker.

SOWING OF EARLY PEAS.—Select a bed with a southern exposure. Manure it, dig in the manure, rake and make drills four feet apart, two inches deep, sow your peas thickly, cover and press the earth gently on them. You need not fear that the frost will kill them; they are hardy, and will resist its influence. We have seen them four inches high covered with snow without being injured. To secure a continuous supply, it is best to sow portions of the bed at intervals of ten or fourteen days.

By laying a piece of charcoal on a burn, the pain subsides immediately. By leaving the charcoal on one hour the wound is healed, as has been demonstrated on several occasions. The remedy is cheap and simple, and certainly deserves a trial.

"Dick," said a master to a servant, "have you fed the pigs?" "Yes, massa, me fed um." "Did you count them, Dick?" "Yes, me count um all but one." "All but one?" "Yes, massa, all but one—dare be one little speckled pig, he frisks about so much he could'nt count um."

MAY.—The man born in this month will be handsome and amiable. He will make his wife happy. The lady will be equally blest in every respect.

A CLOUD of ten thousand gnats dance up and down in the sun—the minutest interval between them—yet no one knocks another headlong upon the grass, or breaks a leg or wing, long and delicate as these are. Suddenly—amidst your admiration of this matchless dance—a peculiarly high-shouldered, vicious gnat, with long, pendant nose, darts out of the rising and falling cloud, and settling on your cheeks, inserts a poisonous sting. What possessed the little wretch to do this? Did he smell your blood in the mazy dance? No one knows.

FRIED POTATOES.—How few cooks know how to fry potatoes. There is nothing so easy to get and yet so palatable for breakfast, with a thick, tender beefsteak, or a mutton chop frying from the gridiron. To fry raw potatoes properly, they should be pared, cut lengthwise in slices an eighth of an inch in thickness, dropped into a pan over the fire, containing hot beef drippings, turned frequently, nicely browned all over but never burned. The addition of a little salt and pepper, while in the pan, and a little flour dredged over them is an improvement.

POLITENESS does much in business. An impudent clerk can do more injury in a store than the neglect of the proprietor to advertise his goods.

JUNE.—The man born now, will be of small stature, and passionately fond of children, but will not be loved in return. The lady will be a personage fond of coffee, she will be married at 21, and be a fool at 45.

HOW TO BUY YOUNG GEESE.—A gentleman who paid the best prices for provisions, and who liked to live as well as did his neighbors—was once deceived, by his butcher, in the age of some poultry he bought. Meeting him, a few days afterwards, he walked up to his wagon and stammered out, (for he was afflicted like poor Charles Lamb, in his speech:)

"G-gu-gu-got any gee-gee-geese, to-day?"

"O, yes!" said the butcher. "A fine lot."

"How ma-ma-*ma*ny you got?"

"A dozen—nice ones."

The customer turned them over, and added—

"N-now you see I've got a pe-pe-pesky set o' fellows at my house! an' they eat a great de-de-deal o' poultry. Hain't you gu-gu-got any old, tu-tu-tough ones."

"Wal—yaas;" said the butcher, picking them over. "There's one—two—*here* four, five of 'em."

"Is them *all* the tu-tu-tough 'uns you've got?"

"Yes—yes. That's all," said the seller, separating them.

"We-we-well, then, I reck'n on the *whole*, concluded the buyer, with a leer, "*I'll ta-ta-take the other lot!*"

The feelings of that butcher may be imagined.

JULY.—The man born in this month will be fair, he will suffer death for the wicked woman he loves. The female will be passably handsome, with a sharp nose, but a fine bust. She will be rather of a sullen temper.

THE TURNIP FLY.—The turnip fly lays its eggs in autumn, but the insect is not developed till the following spring, when it is animated by the warmth of the soil, and usually comes forth to commence its depredatio ns cotemporaneously with the plant on which it is to feed. Stirring the soil for a fortnight or so previous to sowing and affording a good dressing of sulphur, house ashes and soot, equal parts, as soon as the plants appear, is often an effectual remedy. Indeed we have never known it to fail.

Jonathan presented himself and his intended to the minister, for the purpose of being married. Being asked if they had been published—"Oh! I guess so, for I told it to uncle Ben, and he told his wife of it mor'n a week ago."

An Irish footman having carried a basket of game from his master to a friend, waited a considerable time for the customary fee, but not finding it likely to appear, scratched his head, and said, "Sir, if my master should say, 'Paddy, what did the gentleman give you?' what would your honor have me to tell him."

AUGUST.—The man will be ambitious and courageous, but too apt to cheat. He will have several maladies, and two wives. The lady will be amiable, and twice married: but the second husband will cause her to regret the first.

A humorous fellow, subpœnaed as a witness on a trial for an assault, one of the counsel, who had been notorious for brow beating witnesses, asked him what distance he was from the parties when the assault happened; he answered, "just four fect five inches and a half" "How came you to be so exact, fellow?" said the counscl. "Because I expected some fool or other would ask me," said he, "so I measured it."

A gentleman crossing a very narrow bridge which was not railed on either side to secure passengers from falling, said to a countryman whom he met—"Methinks this narrow causeway must be very dangerous, honest friend; pray are not people lost here sometimes?" "Lost, no sir," replied the man, "I never knew any one lost here in my life; there have been several drowned, indeed, but they were always found again."

A spark being brought before a magistrate on a charge of horse stealing, the Justice, the moment he saw him, exclaimed, "I see a villian in your countenance." "It is the first time," said the prisoner, very cooly, "that I knew my countenance was a looking-glass."

SEPTEMBER.—He that is born in this month will be strong, wise and prudent, but too easy with his wife, who will give him great uneasiness. The lady will be round and fair-haired, wily, discreet, affable, and beloved by her friends.

FOR THE CURIOUS.—The greyhound runs by eye-sight only, and this we assert as a fact. The carrier pigeon flies on his two hundred and fifty miles journey homeward by eyesight, to-wit: from point to point of object which he has marked; but this is only our conjecture. The fierce dragon fly, with twelve thousand lenses in his eye, darts from angle to angle with the rapidity of a flashing sword, and as rapidly darts back—not turning in the air, but with a clash reversing the action of his four wings, and instantaneously calculating the distance of the objects, or he would dash himself to pieces. But in what conformation of his does this consist? No one can answer.

RECEIPT TO MAKE A TOMATOE PIE.—Bake the crust very short, scald the tomatoes and peel them, slice them very thin, with light-bread, slice very fine, also; and season with butter, sugar and pepper, and bake them slow.

A lady remarking that she should make but a poor sailor, a nautical friend replied, but you would make an excellent *mate* though.

Though women cannot by law enjoy "sailor's rights," they can command a *smack.*

OCTOBER.—The man will have a handsome face and florid complexion: he will be wicked in his youth, and always inconsistent. He will promise one thing and do another, and always remain poor. The lady will be pretty, a little given to contradiction, a little coquettish, and sometimes a little fond of wine; she will give the preference to l'eau de vie. She will have three husbands, who will die of grief, she will best know why.

TO KEEP CABBAGE for winter, cut the heads off and take away all dead leaves, fold the loose leaves over the head and place them in a trench, dug deep enough to keep them from freezing. Such as have not headed will be very tender and white by Spring.

TO MAKE CROUT, have a churn, or tub, or very tight barrel, as it will be sure to spoil if the brine drips from it. Cut the cabbage very fine and have a maul and pound each layer of cabbage very close, put a half pint of salt to every half bushel of cabbage, cover over all when done with green leaves and a plank over the cabbage leaves, to press and keep down the crout, or something heavy to keep everything down. The brine must rise on top and remain there, or it will spoil if it sinks. Put down a layer of cabbage well pounded and sprinkle each layer with a little salt.

Saratoga and other Northern watering-places keep up military habits. The ladies and gentlemen have a *dress-parade* every evening.

NOVEMBER.—The man will have a fine face, and be a gay deceiver. The lady will be large, liberal, and full of novelty.

A pedantic country schoolmaster asked a sailor what was the third and hal third of ten-pence. The sailor, who was illiterate, but unwilling to confess his ignorance, evaded giving an answer, by saying, that he did not choose to give that knowledge for nothing, which had cost him much trouble and expense to acquire; adding, that he could propose a much harder question than that. The pedagogue piqued at this, exclaimed, "what is that?" "Why," said the tar, "if a pound of cheese cost four-pence, what will a cart load of turnips amount to?"

Three young conceited wits, as they thought themselves, passing along the road near Oxford, met a grave old gentleman, with whom they had a mind to be really merry: "Good morrow, father Abraham," said one; "Good morrow father Isaac," said the next; "Good morrow, father Jacob," said the third. I am neither Abraham, Isaac, nor Jacob, but Saul, the son of Kish, who went out to seek his father's asses, and lo! here have I found them."

"The evils of poverty are more than half relieved, when you have removed from the poor the craving to be rich, and made them contented with their state of life."

DECEMBER.—The man born in this month will be a good sort of a person, though passionate. He will devote himself to the army, and be betrayed by his wife. The lady will be amiable and handsome, with a good voice and well-proportioned body; she will marry twice and remain poor, but remain honest.

MILCH COWS.—This, as well as next month, is very trying upon stock of all kinds; therefore, if you desire your mileh eows to furnish generous supplies of milk, eream, and butter, you must be generous to them. It takes good hay, rich slops and roots, to encourage the mileh cow to give mueh as well as good milk.

POULTRY.—If you desire plenty of eggs, and early spring chickens, see that your fowls are well eared for this month. Give them occasional messes of fresh meat, or of fresh fish—feed them moderately, but daily, with grain, as eorn, oats and buckwheat—provide them with sand, ashes, and gravel.

Two honest gentlemen who dealt in brooms, meeting one in the street, one asked the other, how he eould afford to undersell him every where as he did, when he stole the stuff and made the brooms himself? "Why, you silly dog," answered the other, "I steal them ready made."

Scale of Depreciation.

A BILL TO BE ENTITLED AN ACT TO ESTABLISH A SCALE OF DEPRECIATION OF CONFEDERATE CURRENCY.

WHEREAS, By an ordinance of the Convention, entitled "An Ordinance declaring what laws and ordinances are in force, and for other purposes," ratified on the 18th day of October, A. D., 1865, it is made the duty of the General Assembly to provide a scale of depreciation of the Confederate Currency from the time of its first issue to the end of the war; and it is further therein declared that "all executory contracts, solvable in money, whether under seal or not, made after the depreciation of said currency before the 1st of May, 1865, and unfilled (except official bonds and penal bonds payable to the State) shall be deemed to have been made with the understanding that they were solvable in money of the said currency," subject, nevertheless, to evidence of different intent of the parties to the contract; therefore,

Be it enacted by the General Assembly of the State of North-Carolina, and it is hereby enacted by the authority of the same, That the following scale of depreciation be and the same is hereby adopted and established as the measure of value of one gold dollar in Confederate currency, for each month, and the fractional parts of the month of December, 1864, from the 1st day of November, 1861, to the 1st day of May, 1865, to-wit:

AND, WHEREAS, Many grave and difficult disputes may arise between executors, administrators, guardians and trustees, and their legatees, distributees, wards and *cestuysque* trust, in the settlement of their accounts and trust, arising from the depreciation of Confederate currency, State Treasury notes and Bank notes, incident to and growing out of the late war; and that law suits and expensive litigation may be obviated:

Be it further enacted, That in all such cases the parties are hereby empowered to form a full and perfect statement of the case on both sides, which case shall be committed to the determination of one of the Judges of the Superior Courts, chosen by the parties, who is hereby authorized to consider and determine the same, according to equity and good conscience: *Provided, however*, That no part of this section shall be construed to estop or hinder any person from proceeding in the usual course of law, if he shall deem the same necessary.

GENERAL REMARKS.

Revenue Stamps may be used indiscriminately upon any of the matters or things enumerated in schedule B, except proprietary and playing card stamps, for which a special use has been provided.

Postage stamps cannot be used in payment of the duty chargeable on instruments.

It is the duty of the maker of an instrument to affix and cancel the stamp thereon. If he neglects to do so, the party for whom it is made, may stamp it before it is used; and if used after the 30th of July, 1864, and used without a stamp, it cannot afterwards be effectually stamped. Any failure upon the part of the maker of an instrument to appropriately stamp it, renders him liable to a penalty of two hundred dollars.

Suits are commenced in many States by other process than writ, viz: Summons, warrants, publication, petition, &c., in which case these, as the original process, severally require stamps.

Writs of scire facias are subject to stamp duty as original processes.

The jurat of an affidavit, taken before a Justice of the Peace, Notary Public, or other officer duly authorized to take affidavits, is held to be a certificate, and is subject to a stamp duty of five cents, except when taken in suits of legal proceedings.

Certificates of loan in which there shall appear any printed or written evidence of an amount of money to be paid on demand or at any time designated, are subject to stamp duty as Promisory Notes.

The assignment of a mortgage is subject to the same duty as that imposed upon the original instrument; that is to say for every sum of five hundred dollars, or any fractional part thereof, of the amount secured by the mortgage, at the time of its assignment there must be affixed a stamp or stamps, denoting a duty of five cents.

When two or more persons join in the execution of an instrument, the stamps to which this instrument is liable under the law, may be affixed and cancelled by one of the parties.

In conveyances of real estate, the law provides that the stamp affixed must answer to the value of the estate on interest conveyed.

No stamp is required on any warrant of attorney accompanying a bond or note, when such bond or note has affixed thereto the stamp or stamps denoting the duty required, and whenever any bond or note is secured by mortgage, but one stamp duty is required on such papers, such stamp duty being the highest rates required for such instruments, or either of them. In such a case a note or memorandum of the value or denomination of the stamp affixed should be made upon the margin or in the acknowledgment of the instrument which is not stamped.

Fixed Facts in Agriculture.

1. All lands on which clover, or the grasses are grown, must either have lime in them naturally, or that mineral must be artificially supplied. It matters but little whether it be supplied in the form of stone lime, oyster lime or marl.
2. All permanent use of lands must look to lime as the basis.
3. Lands which have been long in culture will be benefitted by applications of phosphate of lime, and it is unimportant whether the deficiency be supplied in the form of bone dust, guano, native phosphate of lime, compost of fish, ashes or in that of oyster shell lime or marl.
4. No lands can be preserved in a high state of fertility, unless clover and the grasses are cultivated in the course of rotation.
5. Mold is indispensable in every soil—and a healthy supply can alone be preserved through the cultivation of clover, and the grass, the turning in the green crops, or by the application of composts rich in the elements of mould.
6. All highly concentrated animal manures are increased in value, and so their benefits prolonged, by admixture with plaster, salt or pulverized charcoal.
7. Deep plowing greatly improves the productive powers of every variety of soil that is not wet.
8. Sub-soiling sound land, that is, land that is not wet, is eminently conductive to increased production.
9. All wet lands should be drained.
10. All grain crops should be harvested before the grain is thoroughly ripe.
11. Clover, as well as the grasses, intended for hay, should be mowed when in bloom.
12. Sandy lands can be most effectually improved by clay. When such lands require liming, or marling, the lime of marl is most beneficially applied when made into compost with clay. In slacking lime, salt brine is better than water.
13. The dropping, or grinding of grain, to be fed to stock, operates as a saving of at least twenty-five per cent.
14. Draining of wet lands and marshes adds to their value, by making them produce more, and better crops—by producing them earlier—and improving the health of neighborhoods.
15. To manure or lime wet lands, is to throw manure, lime and labor away.
16. Shallow plowing operates to impoverish the soil, while it decreases production.
17. By stabling and shedding stock through the winter, a saving of one fourth of the food may be effected—that is, one-fourth less food will answer, than when such stock may be expected to the inclemencies of the weather.
18. A bushel of plaster, per acre, sown broad-cast over, will add one hundred per cent. to its produce.
19. Periodical applications of ashes tend to keep up the integrity of soils, by supplying most, if not all, of the organic substance.

Miscellaneous Mailable Matter, except seeds, to be put up with both ends of the wrapper open; any writing thereon or enclosed, other than the address, subjects them to letter postage.

ORCHARDS.—Let us enjoin it upon the owner of a farm upon which there is no orchard, to make arrangements to have one set out the coming Spring, or next Fall, as the condition of a farm, without good fruit, is almost as bad as a farmer without a wife. As orchards, when properly planted and cultivated, are destined to last a life time, great pains should be taken in the selection of the kinds of fruit—none but the best should be planted, and those obtained from a nursery-man of reputation.

WHERE the people are educated, they have a proper knowledge of legislation, and the nature of the government, and they cannot be imposed upon by demagogues, and deceived as to their rights.

P. F. PESCUD,

WHOLESALE AND RETAIL DRUGGIST,

AND

Life and Fire Insurance Agent,

RALEIGH, N. C.

MR. PESCUD established his DRUG BUSINESS in Raleigh, N. C., in January, 1844, having been previously engaged in the same business in Petersburg and Clarksville, Va., eight years, and has made a very great many acquaintances and friends in both States, to whom he returns his grateful thanks for their liberal patronage, and from whom he solicits orders for all kinds of

Medicines, Paints, Oils, Dye Stuffs, Instruments, Bandages, Trusses, Saddle Bags, and Chests for Physicians and families, Garden and Grass Seeds, Chemicals, Chemical apparatus and fixtures for Laboratories and Physicians, Tonqua Beans, Licorice and Olive Oil in whole cases for Tobacconists.

He keeps nothing that is not warranted as pure and reliable, and sells to the trade as low as they can buy in the Virginia or any North-Carolina market for cash or country produce.

FLAX SEED AND WAX

particularly needed, and highest cash price allowed.

He represents the PHŒNIX of Hartford, ATLANTIC of Brooklyn, VALLEY OF VIRGINIA, WINCHESTER AND JEFFERSON FIRE INSURANCE COMPANIES, which are regarded as the most safe and reliable in the United States, and he will issue Policies on buildings, Merchandise on sale, and in transit to the Sea Board or any of the Cities of America.

P. F. PESCUD.

He is also Agent for the CONNECTICUT MUTUAL LIFE INSURANCE COMPANY, and the BROOKLYN, and confidently assures the public that no more reliable and desirable Companies are known to the world. The Brooklyn has doubled its capital every year since its organization. All its policies are non-forfeitable, and it paid in 1865, 40 per cent dividends to all the assured whose policies were a year old.

The Connecticut is an older Company, its receipts in 1865 exceeded $4,000,000, it paid 60 per cent premium, and $756,000 to widows and orphans last year. It has $10,000,000 capital safely invested; has never lost a dollar by investment or had a dollar in litigation, and its ratio of expenses, according to receipts, is only 9 per cent.

Most of our people have been accummulating property all their lives for the benefit of their families. They have lost it by the sad war, and its consequences. For $1, $2, $3 or $4 per month they can secure for their families, *at death*, $1,000 to $5,000, according to age, or by a small annuity they can endow their lives, or the lives of their children and friends or debtors, for 8, 10, 20, 30 or 40 years, for one, five or twenty thousand dollars, and if they die before the expiration of the time for which their lives are endowed, it is paid to their representative.

Persons interested should send a stamp and get a pamphlet giving full instructions None are too poor to secure a small sum, and all who love their wives and offspring, or those dependant on their exertions in this life, should not delay a day in making application for a policy or endowment.

MAGNETIC VARIATION.

Magnetie Variation has received very little attention in this State, and only general results can be given. It is well known that the needle of the Surveyors compass does not point due North, and it is important to know the variation:

1. On a line through Beaufort, Newbern, Rocky Mount and Stanton, Va., the needle points directly North.
2. On a line through Ocracoke, near Edenton and Richmond, Va., it points 1 degree West.
3. On a line through Wilmington and Raleigh, it points 44 minutes East.
4. On a line through Wadesboro' and Salisbury, it points 2 degrees East.
5. At the extreme Western part of the State, it points 5 degress East.

TIDES.

The time of high tide is given to within 3 minutes for Beaufort and Smithville daily for one tide; the next may be obtained very nearly by adding 12 hours, 23 minutes to the time of any high tide. The time at Beaufort is subject to a variation of 50 minutes; Smithville, 38 minutes. It is high tide at Wilmington 2 hours and 13 minutes after Smithville. The mean height of the tide at Smithville is given, depending upon the Moon's meridian passage, and without any reference to neap and Spring tides.

TIME.

The rising and setting of the Sun and Moon are given in apparent time, because that is the time generally kept by the people. The meridian passage of the Moon and the Tides are given in the mean time, as is usual in Almanacs. The minutes in the column marked "Equation" added or subtracted to or from mean time, give apparent time; and the reverse operation upon apparent time, will give mean time.

ECLIPSES.

In the year 1868 there will be two Eclipses, both of the Sun, and both invisible in the United States.

1. An Annular Eclipse of the Sun, February 23, beginning at 6 o'clock, 8 minutes and 40 seconds in the morning; visible in Mexico, South Ameriea Afriea and Southern Europe.
2. A Total Eclipse of the Sun August 17th, beginning at 9 o'clock, 20 minutes and 4 seconds in the evening; visible in eastern Africa, Southern Asia and Australia.

All indigent insane persons entitled to be received, and treated, and taken care of at the public charge. Paying patients are also received from this and other States. For proper form to be observed in sending indigent insane to Asylum, see Revised Statutes, chapter on Asylums.

He that reads much should have powerful organs of intellectual digestion—he will otherwise receive but little nutriment into his mind, and, what is worse, will derange the healthy functions of his mental system. The ingenious Mr. Hobbs did not much value a large library, and used to remark, though with singular vanity, that had he read as much as other men he would have been as ignorant as they.

☞ Go to the sign of the Big Boot, Raleigh, N. C., for your Shoes.

EXPANDING THE LUNGS.—Step out into purest air you can find, stand perfectly ereet, with the head up and the shoulders baek, and then fixing the lips as though you were going to whistle; draw the air, not through the nostrils, but through the lips into the lungs. When the chest is about half full, gradually raise the arms, keeping them extended, with the palms of the hands down, as you suek in the air, so as to bring them over the head just as the lungs are quite full. Then drop the thumbs inward, and after gently forcing the arms backward, and the chest open, reverse the proeess by which you draw your breath, till the lungs are empty. This process should be repeated three or four times, immediately after bathing, and also several times during the day. It is impossible to describe to one who has never tried it, the glorious sense of vigor which follows this exercise. It is the best expeetorant in the world.

A BRILLIANT AND DURABLE WHITEWASH.—Take elean lumps of well burnt lime, slackened. Add to ten gallons, one-quarter pound whiting, or burnt alum, pulverized; one pound of loaf sugar; three quarts of rice flour made into a thin and well boiled paste; add one pound of cleanest glue, dissolved as eabinet-makers do. This may be put on eold within doors, but hot, outside. This will be as brilliant as plaster of paris, and retain its brilliancy for many years. This is said to be better than paint for fenees.

WORTH KNOWING.—A poison of any conceivable description and degree of potency, which has been swallowed, intentionally or by accident, may be rendered instantly harmless by swallowing two gills of sweet oil. An individual with a very strong constitution should take twice the quantity. This oil will neutralize every form of vegetable or mineral poison with which the physieians and ehemists are aequainted.

CORN MUFFINS.—Put into a sauce-pan one quart of milk with a small lump of butter and warm it till the butter is soft, but not melted; then add a handful of wheat flour, half a pint of corn meal, four eggs, and a little salt. Beat all together till quite light, and bake as other muffins.

A LADY, attacked with hydrophobie spasms, after being bitten by a rapid dog, in Hamilton county, Indiana, is reported to be in the way of recovering. She was treated with the bromide of potassium, by the physician who attended her.

LIQUID HONEY.—The following receipe, for a beautiful liquid honey, is taken from Mr. Langstroth, who says the best judges have pronounced it one of the most lucious articles they ever tasted. Put two pounds of white sugar in as much hot water as will dissolve it: take one pound of strained white clover honey; any honey of good flavor will answer; and add it warm to the syrup, thoroughly stirring it together. As refined loaf sugar is a pure and inordous sweet, one pound of honey will give its flavor to two pounds of sugar, and the eompound will be free from that smarting taste that pure honey often has, and will usually agree with those who cannot eat the latter with impunity, A good receipe.

Boiling and skimming common honey will generally render it safe for those who cannot eat it otherwise.—*Editor Southern Cultivator.*

EAT SLOWLY.—One of the most usual causes of dyspepsia among our business men arises from the haste in which they swallow their food without sufficiently chewing it, and then hurry away to their active pursuits. In England very little business is transaeted after dinner. There ought to be at least one hour of quiet after a full meal, and from those pursuits which tax the brain, as well as those which exercise the muscles.

THE human voiee has nine perfect tones, but these can be combined into seventeen billion five hundred and ninety-two million forty-four thousand four hundred and fourteen different sounds. A remarkable scientific faet, which probably accounts for the amount of discord there is in the world.

SLEEPLESSNESS.—We recommend our readers who cannot sleep well, to bathe their feet for half or three-quarters of an hour, at bed time, in strong mustard water, as hot as ean be borne.

DR J J LAWRENCE—Dear Sir: Please send me immediately, per Express to Tarboro', two dozen more bottles of your Rosadalis. I have carefully examined its Formula, and have used it in my practice in a number of cases. I am well pleased with it. I think it beyond doubt the BEST ALTERATIVE I ever used. I have tried it in several cases of Scrofula and Scrofulous Affections, &c., with much satisfaction to myself and patients. I have also used it in Secondary and Tertiary Syphilis, [one a terrible case of eight years standing,] in which it acted with surprising and satisfactory effect—making a quick and thorough cure. I have, therefore, no hesitation in recommending it to Physicians, and others, as the most reliable ALTERATIVE now known. Respectfully yours, &c.,
A. B NOBLES, M. D.

A WONDERFUL CURE OF SCROFULOUS WHITE SWELLING.—HOME CERTIFICATE.—I hereby certify that last September I was attacked with White Swelling of the left knee—and also with an enlargement of the glands of the neck—[one tumor reached a large size.] The swelling of the knee was enormous, and was attended with the most excruciating pains. I was so reduced that I was confined to my room over three months. My leg was so completely drawn up, that I could not bend it at all. I tried various remedies, and they failed to give me any relief. I was in this condition when I commenced taking DR. LAWRENCE'S ROSADALIS. The swelling in both knee and neck began to subside before I took all of the first bottle. By the time I took the second bottle, the swelling of the neck entirely disappeared and that of the knee nearly so. After taking three bottles I found myself completely well—able to walk as well as ever, &c.

ROSADALIS WILL CURE THE VERY WORSE CASES OF CHRONIC RHEUMATISM.—HOME CERTIFICATE.—I hereby certify that I was cured of long standing Chronic Rheumatism, by taking four bottles of DR. LAWRENCE'S ROSADALIS. JAMES WILLIS.

ROSADALIS CURES CARBUNCLES, BOILS, PIMPLES, &c.—Certificate from an old and much respected citizen of Greene county, now a resident of Wilson, N. C.

I hereby certify that during the summer and fall of 1866, that I was severely afflicted with Carbuncles, having had as many as 14 large Carbuncles, and 12 ordinary Boils. I suffered so much from them that I could not get out of the house half the time for several months. Being induced to try DR. LAWRENCE'S ROSADALIS. I was entirely cured BY THE USE OF ONE BOTTLE of that truly valuable medicine.
W A. DARDEN, SR.
Wilson, May 11th, 1867.

CONSUMPTION, IN ITS EARLY STAGES, CAN BE CURED.—*Dear Dr Lawrence*—My daughter having been cured of a deeply seated disease of the lungs by your "ROSADALIS," I feel it my duty to make the fact known to you for the benefit of others. She suffered nearly two years with a hard cough, which trombled her day and night, at last the emaciated form, glossy eye, night sweats, together with the cough, told too plainly that it was Consumption beyond question eating at her vitals. Our Physician's remedies brought no relief. She was advised to try your ROSADALIS, as a tonic—which she did—imagine my surprise and gratification when I found her appetite returning. Slowly she regained her strength, her cough and night sweats gradually ceased, and she is now, after taking five bottles of your medicine, apparently as well as ever.
Yours Respectfully,
MRS. E. ANN SMITH.
Baltimore, Md., March 4th, 1867.

ROSADALIS CURES ALL SKIN DISEASES.—Salt Rheum Cured!—Remarkable Cure!—Dr. Lawrence, Wilson—My dear Sir: For the last ten years (until recently) I suffered with an inveterate eruption of the skin—called by Physicians "Salt Rheum," with which I suffered terribly; the pain and itching was almost intolerable. I tried several of the best physicians in Europe and this country—have visited several celebrated Springs—spent thousands of dollars—and failed to get any better. In December, 1866, being in Charleston, S. C., I was told by a gentleman at the hotel, that he had been cured of a bad tetter by a medicine called "Rosadalis." I resolved to try it, without any hope though of its doing me any good. I procured a bottle of Messrs. King & Cassidey, and commenced taking it. Finding to my surprise that I was improroving, I bought four other bottles; but before commencing on the last two, I found I was completely well—the disease having entirely disappeared.
Enclosed find "One Hundred Dollars," which please accept as a token of my gratitude. Why do you not make your invaluable Rosadalis widely known.
Your sincere friend, W. T. SELTSER.
Maj John W Dunham, one of the editors of the Wilson North Carolinian, says in the issue of the 20th, April, 1867: "I believe FROM PERSONAL EXPERIENCE, that the Rosadalis is the finest tonic ever prepared."

EXPLANATIONS AND REMARKS.

The calculations of this Almanac are made in mean Solar or Clock time. This is the time indicated by a well regulated watch or clock, and does not correspond with the sun precisely, except on four days during the year. Apparent time is that which makes the sun come to the meridian at 12 o'clock. No good clock will run with the sun ; if set with it at noon, January 2, the clock would seem to be one minute too fast January 3, at noon.

To adapt the calculations of this Almanac to Apparent time, use the minutes in the column marked "sun slow" or "sun fast," add them when *fast*, subtract them when *slow*.

The calculations are made for the Latitude and Longitude of Raleigh, N. C.; but the times, phases, &c., will vary only a few minutes for any part of North Carolina, South Carolina, Virginia and Tennessee.

RISING AND SETTING OF THE SUN.

The Almanacs generally used in this State have made the rising and setting together equal twelve hours. This is incorrect. During some portions of the year, the sun changes so rapidly in Right Ascension and Declination, that it makes a material change in the Diurnal Arc during the day. The times here given have been rigorously calculated, and compared with the best authority, and are true to the nearest whole minute.

MORNING AND EVENING STARS.

The visible planets are called morning or evening stars, when they rise or set within six hours of the sun.

Morning Stars.—Venus, till May 8; Jupiter, from April 18 till August 7; Saturn, till March 3, and after December 11.

Evening Stars.—Venus after May 8; Jupiter till April 18; Saturn from August 31 till December 11, Mars after May 28. During November Venus, Mars and Saturn will appear very beautiful.

POSITION OF THE PLANETS.

Venus, on the 1st of January, will be in Scorpio, 20 degrees South of the Equator. April 2d it will rise precisely in the East. May 18th it will set a little South of the seven stars. August 24th it will set squarely in the West.

MARS, January 1st, will be in Leo, 13 degrees North of the Equator. March 15 it will reach its furthest northern elongation. May 15 it will be very near Regulus. July 29th it will set in the West, precisely. November 20th, it reaches its greatest Southern declination, and sets 3 degrees South of the sun.

JUPITER, January 1ts, is in Pisces, not near any bright star, nor does it come near any large fixed star during the year.

SATURN, January 1st, is in Scorpio, 20 degrees South of are Equator, and apparently moves very little during one year.

Tides.

The time of high tide can readily be found for the following places by adding the hours and minutes opposite the names to the time when the moon is South on the day for which the tide is sought. The time when the moon is South is given in the calendar for every day. The next tide can be found very nearly by adding 12 hours and 26 minutes to the time of the one previous.

To find the length of the day or night, add 12 hours to the time of rising, and subtract the time of setting, for the day; subtract the time of setting from the 12 hours, and to the remainder add the time of rising next morning, for the night.

Eclipses.

There will be four eclipses this year—two of the Sun and two of the Moon.

I. A partial eclipse of the Moon, January 27, visible at Raleigh.

JANUARY.—Look around you and endeavor to ascertain the results of your industry throughout the past year, in order to make improved arrangements for the future; survey your former practice, and that of your acquaintances, with a view to improve on everything you have done or seen done; make memorandum of such things as may be obtained in moments of leisure, in preference to putting it off until it is wanted.

A SAFE INVESTMENT—Dr. Franklin, speaking of education, says, "If a man empties his purse into his head, no man can take it away from him. An investment in knowledge always pays the best interest."

Article X State Constitution.

HOMESTEADS AND EXEMPTIONS.

SECTION 1. The personal property of any resident of this State, to the value of five hundred dollars, to be selected by such resident, shall be, and is hereby exempted from sale under execution, or other final process of any court, issued for the collection of any debt.

SEC. 2. Every homestead, and the dwelling and buildings used therewith, not exceeding in value one thousand dollars, to be selected by the owner thereof, at the option of the owner, any lot in a city, town or village, with the dwelling and buildings used thereon, owned and occupied by any resident of this State, and not exceeding the value of one thousand dollars, shall be exempted from sale under execution, or other final process, obtained on any debt. But no property shall be exempt from sale for taxes, or for payment of obligations contracted for the purchase of said premises.

SEC. 3. The homestead, after the death of the owner thereof, shall be exempt from the payment of any debt, during the minority of his children, or any one of them.

SEC. 4. The provisions of section one and two of this Article shall not be so construed as to prevent a laborer's lien for work done and performed for the person claiming such exemption, or a mechanic's lien for work done on the premises.

SEC. 5. If the owner of a homestead die, leaving a widow, but no children, the same shall be exempt from the debts of her husband, and the rents and profits thereof shall inure to her benefit during her widowhood, unless she be the owner of a homestead in her own right.

SEC. 6. The real and personal property of any female in this State, acquired before marriage, and all property, real and personal, to which she may after marriage become in any manner entitled, shall be and remain the sole and separate estate and property of such female, and shall not be liable for any debts, obligations or engagements of her husband, and may be devised or bequeathed, and, with the written assent of her husband, conveyed by her as if she were unmarried.

SEC. 7. The husband may insure his own life for the sole use and benefit of his wife and children, and in case of the death of the husband the amount thus insured shall be paid over to the wife and children, or the guardian, if under age, for her or their own use, free from all the claims of the representatives of the husband, or any of his creditors.

SEC. 8. Nothing contained in the foregoing sections of this Article shall operate to prevent the owner of a homestead from disposing of the same by deed; but no deed made by the owner of a homestead shall be valid without the voluntary signature and assent of his wife, signed on her private examination according to law.

READING. Make it a rule to read a little every day, even if it be but a single sentence. A short paragraph will often afford you a profitable source of reflection for a whole day. For this purpose keep some valuable book or paper always within your reach, so that you may lay your hand on it at any moment when you are about the house.

INFORMATION FOR THE PEOPLE.

PARTIAL DIGEST OF STATE CONSTITUTIO N

SUFFRAGE AND ELLIGIBILITY TO OFFICE.—Every male person born in United States, or naturalized; 21 years old and upward resident 12 months in State and 30 days in county, shall be deemed an elector.

Warrant of attorney accompanying a bond or note, if the bond or note is stamped, exempt.

In all cases where an *adhesive* stamp is used for denoting the stamp duty upon an instrument, the person using or affixing the same must write or imprint thereupon *in ink* the initials of his name, and the date (the year, month and day) on which the same is attached or used. Each stamp should be separately cancelled. When stamps are printed upon checks, &c., so that in filing up the instrument, the face of the stamp is and must necessarily be written across, no other cancellation will be required.

All cancellation must be distinct and legible, and except in the case of proprietary stamps from private dies, no method of cancellation which differs from that above described can be recognized as legal and sufficient.

Rule for Finding the Day of the Week on which any Given Year Begins.

Divide the date by 4 and add the product to the date, disregarding fractions; then divide the amount by 7, and if there be no remainder, the first day of January for the given year will be Sunday; if one remainder, it will be Monday; if two, Tuesday, &c. If, however, in dividing by 4 there be no remainder, the first day of January will be one day earlier. Thus:

4)1839
459X3

7)2298

328X2

0 is Sunday, 1 Monday, 2 Tuesday; hence, as there was a remainder in dividing by 4, the first of January, 1839, was Tuesday.

4)1844
461X0

7)2305

329X2

0 is Sunday, 1 Monday, 2 Tuesday; but as there was no remainder in dividing by 4, the first day of January, 1844, was one less, or Monday.

If there be a remainder when you divide by 4 and none when you divide by 7, the first of January for the given year will be Sunday; but if there be no remainder when you divide by 4 and none when you divide by 7, the first of January will be Saturday. Hence, one remainder when you divide by 7 will make Monday or Sunday, as the case may be, &c.

Having found the day of the week on which the year entered, the day of the week for any month in the year may be found by the following old and, to many, familiar rule:

Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.
1st.	4th.	4th.	7th.	2d.	5th.	7th.	3d.	6th.	1st.	4th.	6th.
A.	D.	D.	G.	B.	E.	G.	C.	F.	A.	D.	F.

EXPLANATION.—The first seven letters of the alphabet are taken and a

part of them repeated to make twelve—one for each month. The above table will now be easily understood. If January, represented by A, comes in on any given day, say Sunday, then February will enter on Wednesday, the fourth day from Sunday, as D., which represents February, is the fourth letter from A.; and so April will enter on Saturday, the seventh day from Sunday, as G is the seventh letter from A, and so on with each month.

As it is difficult to remember the letters in their order, some questionable poet has made the following couplet, each word of which begins with one of these letters:

"At Dover Dwelt John Brown, Esquire,
Good Christopher French And David Fryer."

As indicated by the initial letters for those months, February and March always enter on the same day of the week, except in leap year.

The law provides that all executory contracts, solvable in money, whether under seal or not, made after the depreciation of said currency before the 1st day of May, 1865, and unfilled, (except official bonds and peace bonds payable to the State,) shall be deemed to have been made with the understanding that they were solvable in money of the said currency, subject nevertheless, to evidence of different intent of the parties to the compact. The law further provides that the scale of depreciation shall be construed to apply to the date of contracting a debt, and not at the time the debt became due.

It will afford sweeter happiness, in the hour of death, to have wiped one tear from the cheek of sorrow, than to have ruled an empire, or to have conquered millions and enslaved the whole world.

Herschel's Weather Prognosticator.

A TABLE FOR FORETELLING THE WEATHER THROUGH ALL THE LUNATIONS OF EACH YEAR FOREVER

This table and the accompanying remarks are the result of many years' actual observations, the whole being constructed on a due consideration of the attraction of the Sun and Moon, in their several positions respecting the earth, and will, by simple inspection, show the observer what kind of weather will most probably follow the entrance of the Moon into any of her quarters, and that so near the truth as to be seldom or never found to fail.

If the new moon, first quarter, full moon, or last quarter happen	IN SUMMER.	IN WINTER.
Between midnight and 2 in the morning	Fair	Hard frost, unless the wind be S. or S. W.
Between 2 and 4 morning	Cold, with frequent showers	Snow and stormy.
Between 4 and 6 morning	Rain	Rain.
Between 6 and 8 morning	Wind and rain	Stormy.
Between 8 and 10 morning	Changeable	Cold rain, if wind be W., snow if E.
Between 10 and 12 morning	Frequent showers	Cold and high wind.
At 12 o'clock at noon and 2 in the afternoon	Very rainy	Snow or rain.
Between 2 and 4 afternoon	Changeable	Fair and mild.
Between 4 and 6 afternoon	Fair	Fair.
Between 6 and 8 afternoon	Fair, if wind N. W. Rainy, if S. or S. W.	Fair and frosty, if wind N. or N. E., rain or snow, if S. or S. W.
Between 8 and 10 afternoon	Ditto.	Ditto.
Between 10 and midnight	Fair	Fair and frosty.

OBSERVATIONS.—1. The nearer the time of the Moon's change, First Quarter, Full and Last Quarter are to Midnight, the fairer will the weather be during the seven days following.

2. The space for this calculation occupies from ten at night till two next morning.

3. The nearer to mid-day, or noon, these phases of the moon happen, the more foul or wet weather may be expected during the next seven days.

4. The space for this calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the summer, though they affect spring and autumn nearly in the same ratio.

5. The moon's change, first quarter, full moon and last quarter happening during six of the afternoon hours, that is, from four to ten, may be followed by fair weather; but this is mostly dependent on the wind, as it is noted in the table.

6 Though the weather, from a variety of irregular causes, is more uncertain in the latter part of autumn, the whole of winter, and the beginning of spring, yet, in the main, the above observations will apply to those periods also.

Measurement of Corn in the Crib.

After leveling the corn, multiply the length and breadth of the house together, and the product by the depth, which will give the cubic feet of the bulk of corn; then divide this last product by 12, and the quotient will be the number of barrels of shelled corn contained in the house or crib. If there be a remainder after the division, it will be so many twelfths of a barrel of shelled corn over.

Example.

12 feet long
11 feet broad

132
6 feet deep

12)792 cubic feet

66 barrels of shelled corn
5 bushels in a barrel

330 bushels of shelled corn

Memoranda.—21,500 cubic inches wil contain ten bushels of shelled corn, bul the same space filled with corn *in the ear* will shell out rather more than five bushels. These 21,500 cubic inches contain 12 cubic feet, and 764 cubic inches over. Now, two barrels, or ten bushels in the ear, will generally, in shelling, overrun just about these 764 cubic inches.

The period of gestation of the mare is very irregular, being from 11 to 13 months; that of the she-ass (jenny) about 12½ months; of the bitch, 63 days; of the cat, 50 days; of the rabbit, 28 days.

An Irishman, having arrived in this country, struck across the fields for employment. While ascending a hill he suddenly came to a stand-still at the sight of a turtle, slowly wending its way. Pat, never having seen the animal before, exclaimed: "Howly mither! the divil of a country is this where the snuff-boxes walk up hill."

A darkey preacher was telling how Adam was the first man created, and set up against the fence to dry. An old brother, who sometimes had lucid ideas, interrupted him and said:—"If dat is true, who made de fence?" Pass around the sasser.

CURE FOR WHOOPING COUGH.—Take a teaspoonful of fresh sweet oil; grate in sufficient nutmeg to cover the top; mix and administer morning and night.

VALUABLE MEDICAL RECEIPTS.

CROUP.—The following is said to be an effectual cure for this complaint in children :—A teaspoonful of the solution of a piece of indigo about the size of a pea in a pint tumbler of milk-warm water. The juice pressed from onions is said to be excellent, given in molasses until vomiting is produced.

CHOLERA OR BOWEL COMPLAINT.—The following mixture is extensively used to check a sudden attack of this complaint :—Tincture of opium, ½ oz ; do. red pepper ½ oz ; do. camphor, ½oz ; do. rhubarb, ½ oz ; essence of peppermint, ½ oz. Dose for an adult' 10 to 15 drops ; children in proportion.

CURE FOR SORE THROAT.—Take one teaspoonfull each of red pepper and common salt, mix with vinegar, and gargle the throat repeatedly.

COUGH SYRUP.—Take Iceland moss, 2 ounces, 4 poppy heads, 4 tablespoonsful of barley ; put in 3 pints of water, boil down to 2, and strain it; add 1 pound of sugar. Dose, a tablespoonful whenever the cough is troublesome. Another, boil down thoroughwort to a thick syrup, sweeten with molasses.

TO STOP BLEEDING.—Cover the wound with cobweb; or, flour and salt, half of each.

FOR SORE EYES.—Use ten grains of pure sulphate of zinc. dissolve in two ounces of rose water and bathe the eyes two or three times daily.

PERSONS SUFFERING FROM APOPLEXY.—No time should be lost in pouring down water if sufficient sensibility remains to allow of swallowing , if not the head must be sponged with cold water until the sense returns, when salt will completely restore the patient from the lethargy.

TO CURE A FELON.—Take equal parts of gum camphor, gum opium, castile soap and brown sugar ; wet to consistency of paste with spirits of turpentine and apply it. This is said to be a certain cure.

CURE FOR HEADACHE.—Make a mixture of two parts of ice and one part of salt, and apply it by means of a little purse of silk gauze with a rim of gutta percha to limited spots on the forehead, or other parts of the scalp where rheumatic headache is felt- The skin is subjected to the process from half to one-and-a-half minutes, and is rendered hard ard white.

COLONEL BIRCH'S RECEIPT FOR RHEUMATIC GOUT, OR ACUTE RHEUMATISM.—Half an ounce of nitre (saltpetre,) half an ounce of sulphur halr an ounce of flour of mustard, half an ounce of Turkey rhubarb, quartef of an ounce of powdered gum guaiacum. Mix. A teaspoonful to be taken every other night for three nights, and omit three nights, in a wineglass of cold water—water that has been boiled.

CURE FOR HYDROPHOBIA.—The *Leipsic* German Journal publishes the following antidote for the bite of a mad dog, which it says was an exclusive secret with a Saxon forester, but who, growing old, was unwilling to let it die with him, and therefore procured its publication. He is said to have used it for fifteen years, and rescued many human beings and cattle from the fearful death of hydrophobia. The antidote: Take immediately tepid water ; wash the wound clean therewith, and then dry it ; then pour upon the wound a few drops of hydrocuioric acid, because mineral acids destroy the poisons of the saliva, by which means the latter is neutralized.

Valuable Domestic Receipts.

How to keep Hams Through the Summer.—After your hams have taken salt, hang them up and smoke them well, then take them down and dip them into boiling water for a few seconds; that will kill all the eggs of insects, if there should be any on them; then roll them in dry ashes while wet and hang them up again; smoke them more if you choose. This will do also for shoulders and sides; and those that do their bacon in this way will never have any bugs or skippers on their meat.

A Useful Cement is made by taking two parts of finely sifted unoxidized iron filings, mixing them with one part of perfectly dry and finely powdered loam, and kneading the mixture with strong vinegar until a perfectly homogeneous plastic mass is formed, when the cement is ready for use. It must be made as wanted, for it quickly hardens, and once set is never fit for use again. The cement is said to resist fire and water.

Liquid Blacking.—Boil one ounce each of powdered galls, starch, and copperas, and two ounces of white castile soap with two quarts of water, then strain and mix with three ounces of fine ivory black, and six ounces of molasses.

A Good Vermifuge.—Castor oil 1 oz., petroleum ½ oz., spirits turpentine 3-4 oz., wormseed oil ⅛ oz. Dose : children under a year old, three doses a day of half a teaspoonful each, one hour apart. Increase the dose a quarter of a teaspoonful for every additional year of age.

How to Conquer Beligerant Bees.—When it is discovered that two swarms of bees are at war with each other, by turning up the hive containing the attacking bees thrusting a stick up into the honey, and fracturing the comb, you will at once stop all further aggression, and set the bees repairing the damage done to their own empire, instead of trying to conquer another.

A Black ink, not corroding steel pens, and neutral may be prepared by digesting in an open vessel, 42 ounces of coarsely powdered nutgalls, 15 ounces of gum senegal, 18 ounces of sulphat of iron, (free from copper,) 3 drachms of aqua ammonia, 24 ounces of alcohol, 18 quarts of distilled or rain water. Continue the digestion until the fluid has assumed a deep black color.

To Color Cotton and Flax Carpet Warp, Green.—The following has been often tried with success ; will not color woolen ; Put in a bag 1 lb. fustic, with ½ lb. chip logwood, and soak over night in 6 gallons rain water. Then boil one hour, and add 1 ounce of blue vitriol (sulphate of copper,) skimming carefully. The clothes or carpet warp are to remain in this a short time, constantly stirred.

Care of Harness.—Many persons owning harness do not wash or oil them once a year; consequently the leather becomes hard dry and rotten. A harness for service needs about two applications of neat's foos oil a year, but it should be washed as often as once in three or four weeks in strong Castile soap-suds, and kept in a dry place away from the dust.

Stains of Wine Fruit&c.—Rub the part on each side with yellow soap. Then lay a mixture of starch in cold water very thick ; rub it well in, and expose the linen to the sun and air till the stain comes out. If not removed in three or four days. rub that off, and renew the process. When dry, it may be sprinkled with a little water.

Valuable Cooking Receipts.

Virginia Egg-Bread.—Dissolve one tablespoonful of butter in three and a half pints of milk; add one quart of Indian meal, half a pint of wheat flour, a little salt, and two eggs, well beaten; mix all well together, and bake in a buttered tin.

Beef-Steaks.—The best pieces for steak are the sirloin and rump; they should be cut nearly an inch thick. If the beef is tough, sprinkle carbonate of soda over it for an hour or two, washing it off when needed for cooking. To fry a steak, put into a saucepan lard enough to nearly cover the steak; let it be boiling hot, as it will cause the meat to retain its juicy flavor; sprinkle on the steak sufficient salt and pepper to season it, dredging it on both sides with flour; put into the boiling lard, and cover the saucepan closely; add one onion, sliced thin, if preferred. Ten minutes is sufficient time to cook it.

To Broil a Steak.—Prepare a brisk fire of coals; put your gridiron over it, but do not let it get too hot before you put on the steak. As soon as the sinews become crisped a little, turn the steak; be careful not to spill the gravy on the fire. It will require ten minutes to scald it through and brown the outside. As soon as the steak is cooked put it on a hot dish; add a little black pepper and butter; serve hot.

To Clear Coffee—Turkish Mode.—As soon as your coffee boils, pour some into a cup and fling it back into the pot; repeat the operation until the grounds sink, when the coffee will pour off clear.

Bread Omelette.—Put into a stew-pan a teacup-full of bread crumbs, a teacup of cream, a spoonful of butter, with salt, pepper and nutmeg. When the crumbs absorb the cream, break in the eggs, beat them with the mixture, and fry like plain omelette.

Fried Potatoes.—Peel, wipe dry, and cut in thin slices, put in a frying pan of hot lard; when brown and crisp, drain in a colander; sprinkle with salt, and serve very hot.

Pound Cake.—One pound of flour, one pound of sugar, one pound of butter, and eight eggs; beat it well, and bake three quarter of an hour.

Johnny Cake.—Take a quart of sour milk, a teaspoon-full of salt. sifted meal to make a stiff batter, a teaspoon-full of dissolved saleratus, Butter a pan, and bake nearly an hour.

Buckwheat Cakes.—Take two quarts of water, blood warm, half a pint brewer's yeast, make a thin batter, let them rise as far as they will come, then add three fourths of a teaspoon-full of carb. soda, dissolved in a little water, then fry them as quick as you like.

Hominy Cakes.—Get some grated hominy, and boil it in milk; bea up three eggs, with a pint of milk and a little salt; beat this all together into a batter; then have some boiled fat, and make the cakes, and p u them in the fat and fry; eat them with ham. It is an excellent dish fo breakfast.

Rice Pudding.—Take one pound of rice, boiled well with rich milk, stirred well until it is soft, and then add half a pound of butter, twelve eggs, well beaten, spice to your taste, and bake it.

Mock Oysters of Green Corn.—Mix a pint of grated green corn with three spoonfulls of milk, a teacup of flour, half a teacup of drawn butter, a teaspoon-full of salt, half a teaspoon-full of pepper, and one egg. Drop by the spoon-full into hot butter, and let the cakes fry from eight to ten minutes.

ANECDOTES.

A CONTENTED FARMER.—Once upon a time, Frederick, King of Prussia, surnamed "Old Fritz," took a ride, and espied an old farmer, ploughing his acre by the wayside, cheerily singing his melody.

"You must be well off, old man," said the King. "Does this acre belong to you, on which you so industriously labor?"

"No, sir," replied the old farmer, who knew not that it was the King, "I am not so rich as that; I plough for wages."

"How much do you get a day?" asked the King.

"Eight groschen," (about twenty cents,) said the farmer.

"This is not much," replied the King. "Can you get along with this?"

"Get along and have something left."

"How is this?"

The farmer smiled and said.

"Well, if I must tell you, two groschen are for myself and wife; with two I pay my old debts; two I lend away; and two I give away for the Lord's sake."

"This is a mystery which I cannot solve," replied the King.

"Then I will solve it for you," said the farmer. "I have two old parents at home, who kept me when I was weak and needed help; and now that they are weak, and need help, I keep them: this is my debt towards which I pay two groschen a day. The third pair of groschen which I lend away, I spend for my children, that they may receive a Christian instruction: this will came handy to me and my wife when we get old. With the last two groschen I maintain two sick sisters, whom I would not be compelled to keep; this I give for the Lord's sake."

The King, well pleased with his answer, said:

"Bravely spoken, old man. Now I will also give you something to guess. Have you ever seen me before?"

"Never," said the farmer.

"In less than five minutes you shall see me fifty times, and carry in your pocket fifty of my likenesses."

This is a riddle which I cannot unravel," said the farmer.

"Then I will do it for you," replied the King.

Thrusting his hand into his pocket, and counting him fifty bran new gold pieces into his hand, stamped with his royal likeness, he said to the astonished farmer, who knew not what was coming.

"The coin is genuine, for it also comes from our Lord God, and I am his paymaster. I bid you adieu."

JUST TO SEE.—One evening at the threatre, Jno. Phœnix observed a man sitting three seats in front, whom he thought he knew; he requested the person sitting next to him to punch the other individual with his cane. The polite stranger did so, and the disturbed person turning his head a little, he discovered his mistake—that he was not the person he took him for. Fixing his attention steadfastly on the play, and affecting his unconsciousness of the whole affair, he left the man with the cane to settle with the other for the disturbance, who being wholly without an excuse, there was of course a ludicrous and embarrassing scene, during all of which Phœnix was profoundly interested in the play. At last the man with the cane asked indignantly, "Didn't you tell me to punch the man with my stick?" "Yes." "And what did you want?" "I wanted to see whether you would punch him or not."

MARRY HER FIRST.—Many years ago in what is now a flourishing town in this State. lived a stalwart blacksmith, fond of pipe and his Joke. He was also fond of his blooming daughter, whose many graces and charms had ensnared the affections of a susceptible young printer. The couple, after a season of biling and cooing, "engaged themselves" and nothing but the consent of the young lady's parents prevented their union, to obtain this an interview was arranged and typo prepared a little speech to admonish and convince the old gentleman, who sat enjoying his favorite pipe with content. Typo dilated upon the fact of their long friendship, their natural attachment, their hopes for the future, and like topics ; and taking the daughter by the hand, said ; "I now, sir, ask you permission to transplant this lovely flower from its parental bed,"—but his feelings overcame him, he forgot the remainder of his oratical flourish, blushed, stammered, and finally wound up with —"from its parental bed *into my own.*"

The father keenly relished the discomfiture of the suitor, and after removing his pipe and blowing a cloud, replied:

"Well, young man, I don't know as I've objections, *provided you will marry the girl first.*'

A Yankee and a Frenchman owned a pig in co-partnership. When killing time came, they wish to divide the carcass. The Yankee was anxious to divide so that he could get both hind-quarters, and persuaded the Frenchman that the proper way to divide was to cut it across the back. The Frenchman agreed to it, on condition that the Yankee would turn his back and take choice of the pieces after it was cut in two. The Yank turned his back and the Frenchman said :

"Vich piece will you have ; ze piece vid de tail on him, or ze piece vat aint got no tail on him ?"

"The piece with the tail !,' shouted the Yankee instantly.

" Den, by gar, you take him, and I take ze oder," said the Frenchman,

Upon turning around the Yankee found that the Frenchman had cut off the tail and stuck it in the pig's mouth.

Governor S—— was a spended lawyer, and could talk a jury out of their seven senses. He was especially noted for his success in criminal cases, almost always clearing his client. He was once counsel for a man accused of horse-stealing. He made a long, eloquent, and touching speech. The jury retired, but returned in a few moments, and, with tears in in their eyes, proclaimed the man not guilty. An old acquaintance stepped up to the prisoner and said—

"Jem, the danger is past ; and honor bright, didn't you steal that horse ?"

To which Jem replied,—

"Well, Tom, I've all along thought I took that horse ; but since I've heard the Governor's speech I don't believe I did.

YOUNG AMERICA AT THE WHEEL.—A well-known clergyman was crossing Lake Erie, some years ago, upon one of the lake steamers ; and seeing a small lad at the wheel, steering the vessel, he accosted him as follows : "My son, you appear to be a small boy to steer so large a boat." "Yes, sir," was the reply ; but you see I can do it, though." "Do you think you understand your business, my son ?" "Yes, sir ; I think I do." "Can you box the compass ?" "Yes, sir." "Let me hear you box it." The boy did as requested, when the minister said : "Well, really, you can do it ! Can you box it backwards ?" "Yes, sir."

"Let me hear you." The boy again did as requested, when the minister further remarked: "I declare, my son, you do seem to understand your business." The boy then took his turn at question asking, beginning: "Pray, sir, what might be your business?" "I am a minister of the Gospel." "Do you understand your business?" "I think I do, my son." "Can you say the Lord's Prayer?" "Yes." "Say it." The clergyman did so, repeating the words in a very fervent manner, as though trying to make an impression on the lad. "Well, really," said the boy at its conclusion, "you do know it, don't you? Now say it backwards." "Oh! I can't do such a thing as that. Of course——" "You can't do it, eh?" interrupted the boy; "well, then, you see I understand my business a great deal better than you do yours." The clergyman acknowledged himself beat, and retired.

THE MAN WHO NEVER HEARD A PIANO.—One time an Arkansas man, genuine character, who had been born and bred in the backwoods, happened to be in a river town on the banks of the "Father of Waters," when one of the large and magnificent steamboats was lying at the pier. Our hero was magnificently clad in a working cap, and blue homespun trowsers thrust in his enormous cowhide boots. His huge red hands were adorned with brass rings, and several warts as large as nutmegs, which gave notice of his approach as he walked, like the rattle of a reptile. Attracted by the sound of music, the genius strolled on board the boat and accosted the captain "Morning, stranger. Pretty pert music hereabouts.—What mout it come out?" "A piano forte, sir." "A what?" "Piano-forte!" "Never heerd of them 'ere things afore. Where mout it be stranger?" "In the lower cabin, sir." "Mought I take a look at the————thing?" "Certainly, sir, walk down." The Arkansas man needed no further invitation. He went "down stairs," into the cabin, where two tables were laid out for dinner. Walking up the narrow passage between them, he swept off knives and forks, by the swing of his flaps, but so intent was he upon the music and the piano at the further end of the cabin, that he heeded not the ruin he created. Approaching the instrument he literally devoured it with his eyes. The young lady who was seated at it continued playing, and the stranger was wrapped in silent wonder. At length when the sound ceased, he raised his cap respectfully and addressed the audience. "Ladies, I am much obliged to you for the kindness you have done me. I never heard one of them afore, and never 'spect to again." "You appear to be very much pleased with it," observed a lady. "Why, yes, ma'am, I am—somewhat—and perhaps I should like it better if I had an ear for music, like my brother. Yes, I like it well enough; but if my brother Dick could only hear that 'ere thing, ladies, *he'd tear his shirt and fall right through it!*"

NICELY CAUGHT.—Watty Morison, a Scotch clergyman, was a man of great wit and humor. On one occasion he entreated an officer at Fort George to pardon a poor fellow who was sent to the halberds. The officer offered to grant his request, if he would, in return, grant the first favor he would ask. Mr. Morrison agreed to this, and the officer immediately demanded that the ceremony of baptism should be performed on a puppy. The clergyman agreed to it, and a party of many gentlemen assembled to witness the novel baptism. Mr. Morrison desired the officer to hold up the dog, as was customary in the baptism of children, and said, "As I am a minister of the Church of Scotland, I must proceed according to the ceremonies of the Church." "Certainly," said the Major, "I expect all the ceremony." "Well, then, Major, I

begin by the usual question :—You acknowledge yourself the father of this puppy?" A roar of laughter burst from the crowd, and the officer threw the candidate for baptism away.

THEY MADE A MISTAKE —Our friends P——— and S——— one evening met at the house of an acquaintance with some young ladies, for whom both gentlemen entertained tender feelings. In a spirit of frolic one of the young ladies blew out the lamp, and our two friends thinking it a favorable time to make known the state of their feelings to the fair objects of their regard, moved seats at the same instant, and placed themselves as they supposed by the lady's side, but she had also moved, and the gentlemen were in reality seated next to each other. As our friends could not whisper without betraying their whereabouts, they both took, as they thought, the soft hand of the charmer, and when after a while they ventured to give a tender pressure, each was enraptured to find it returned with an unmistakable squeeze. It may well be imagined that the moments flew rapidly, in the silent interchange of mutual affection. But the rest wondering at the unusual silence of the gentlemen, one of them noiselessly slipped out and suddenly returned with a light; there sat our friends P. and *S.* most lovingly squeezing each other's hand—and supreme delight beaming in their eyes. Their consternation and the ecstacy of the ladies may be imagined, but not described. Both gentlemen *sloped*, and P. was afterwards heard to say that he thought all the while S———'s hand felt hard.

EFFECTS OF GUANO.—A yankee lad whose father was a farmer, went into a barn to play a short time ago, and being detained a prisoner by a thunder storm, he fell asleep on a bag of guano. The old gentleman, when the storm was over, went into the farm yard to look after his son. and met a giant coming out of the barn.

"Hallo! who are you? he cried, 'what are you doing here?'

'Why, father,' squcaked the Goliah, 'it's me; don't you know Tommy?'

'You!' the astonished parent exclaimed; 'why, why, Tom, how on earth did you get stretched out so long in so short a time?'

'Why, father,' replied the boy looking down upon the gaping old man, 'I slept upon them bags of guano you put in the barn, and that and the lightning has done the business!

A Dutchman, with a bad wife, told his master that "she wash tronk all te tay Saturday night, and all te night Sunday morning, and I vos so vild that I kick ter stairs right down her."

Young man, do you believe in a future state? "In course I duz; and what's more, I intend to enter it as soon as Betsy gets her things ready.

What can be a more desolate spectacle than an old maid sitting on an inverted half-bushel, in a cold kitchen, with her feet on the brim of a slop-bucket, paring her corns with a case knife by the light of a tallow candle.

Spell murder backward, and you have its cause. Spell its cause in the same manner, and you see its effect.

"You want nothing, do you?" said Pat, "Bedad, an' if its nothing you want, you'll find it in the jug where the whiskey was."

A YOUNG lady being asked by a feminine acquaintance whether she had any original poetry in her album, replied: "No; but some of my friends have favored me with original spelling."

The Board of Directors have adopted a plan of life Assurance which offers extraordinary inducements to our citizens, to avail themselves of the benefits conferred by thus providing for dependent families, after the head, and source of income, is removed by death. This plan, (known to the public, as the *Masonic* plan of Assurance,) has been eminently successful in an adjoining *State*, whose citizens labor under the same pecuniary disadvantages that we are at present suffering from. Its advantages over the usual system of Life Assurance are:

Because it is perfectly simple, easily explained, and understood. Not complicated as the details of other companies, with numerous unintelligible conditions and calculations, which to the policy holder are never understood.

It especially commends itself, in these times of scarcity and poverty, on account of its cheapness; a member of the company having to pay, from 50, to 100 *per cent*, less for a policy of the same amount, than is charged by other companies.

It requires no money to be paid down except an Entrance Fee, graduated according to age and ranging from Five to Fifty Dollars. Upon the death of a member, the survivors are assessed Two Dollars and Fifty *Cents* each, the aggregate of which assessments is the amount of the policy paid.

The Policies are only forfeitable, where a member fails to pay the assessments levied.

IT KEEPS OUR MONEY AT HOME, WHERE IT IS NEEDED.

For full particulars, address the Secretary at Raleigh, N. C.
